## 1. INTRODUCTION

Environmental protection is a duty for the Eurobank Group. In 2003, the Bank initiated its environmental protection effort by enacting its official Environmental Policy, which aims at mitigating its environmental impacts.

The Environmental Policy is implemented through the introduction and operation of an Environmental Management System (EMS). In 2004, Eurobank became the first bank in Greece, and remains one of the few banks in Europe, to have established an externally certified, ISO 14001 compliant Environmental Management System (EMS). An annual surveillance is performed on the EMS by TUV HELLAS, an independent and accredited Certification Agency.

In 2009, the System moved closer to “maturity” through the completion of procedures for the official listing of Eurobank in the EMAS Register of the Ministry of Environment and Energy (registration number EL-000080) of European Organizations that adhere to the EMAS regulation (Regulation EC/761/2001) on Environmental Management. As stated in the European Commission’s official documents, this transition facilitates the improvement of environmental performance, and increases the transparency and reliability of environmental management.

Sustainability issues, including Environmental issues, are deemed crucial by the Management of the Eurobank Group, and have been entrusted to the Group Environmental & Sustainability Committee, chaired by the Deputy Chief Executive Officer – Group Chief Operating Officer (COO) & International Activities. The Committee comprises the heads of all the Bank’s Units that are involved in the implementation of Sustainability policies, including the Environmental Policy & the Energy Management Policy, so that pertinent decision-making and planning are dealt with at the strategic level.

The Group’s environmental activities and the promotion of Sustainability are coordinated by the Group Sustainability/Environmental & Social Affairs Division, with the main purpose of seeing to the implementation of the Environmental Policy and the achievement of the targets emanating from it.

The improvement of the Bank’s environmental performance does not only foster its sustainable growth, but also generates competitive advantages, such as:

- the reduction of operating expenses;
- the exploitation of new business opportunities, such as the development and promotion of “green” banking products.

One of the main principles of the Eurobank group is that international commitment to Sustainable Development can only be achieved through partnerships. To this end, the Group has joined the United Nations Environment Programme Finance Initiative (UNEP FI) since 2005, and works together with the United Nations Environment Programme on the Protection of the Environment and the promotion of Sustainable Development. Represented by its Group Sustainability/Environmental & Social Affairs Division, the Bank has held senior administrative positions at the Global Steering Committee, the Banking Commission, as well as the Chairmanship of the European Task Force of UNEP FI (2010-2014). Through its influential role in the proceedings of this Organization, the Group has actively contributed to the drafting and publication of the first of its kind Sustainable Banking Guide, which is a best practice manual for banks worldwide; the Guide is available at: ([www.unepfi.org/fileadmin/documents/guide\\_banking\\_statements.pdf](http://www.unepfi.org/fileadmin/documents/guide_banking_statements.pdf))

Moreover, the Bank is a member of the expert panel of the European Commission Energy Efficiency Financial Institutions Group (EFFIG) and the Sustainable Development Committee of the Hellenic Bank

Association, and is a sustainability ambassador in the “Sustainable Greece 2020” initiative, which aims at raising awareness on Sustainable Development and Responsible Entrepreneurship.

The Management of the Eurobank group aims at gradually extending the implementation of the Environmental Policy, as well as disseminating its certified and award-winning environmental practices, to the Group’s subsidiaries in Greece and abroad. Moreover, Environment Offices have been operating in the Group's subsidiary banks in Serbia, Bulgaria, and Romania, with the sustained support of the Group Sustainability/Environmental & Social Affairs Division, with the aim of continuously improving the environmental profile of these companies.

The scope of the Bank's Environmental Management System is the "Provision of Banking and Financial Services", the application position is Greece, and the Certification extends to all Central Divisions and branches, which resulted following the operational merger with New TT Hellenic Post Bank that was completed in 2014 (31 buildings and 485 branches of the Eurobank and New TT Branch Network, as shown in Appendix I).

This report, which includes the Bank's performance-related data and results, has been drawn up, validated, and verified following the annual audit by the accordingly accredited Certification Body, as part of the fulfillment of the EMAS requirements, and in order to provide the public and all interested parties with credited environmental information about Eurobank.

The information included in this report refers to the environmental policy, environmental impacts, performance and results of Eurobank concerning the total of the Bank’s points of presence, based on the environmental objectives and targets it has set.

Date: 14/10/2016

S. Ioannou  
Chairman of the Group Environmental &  
Sustainability Committee  
Deputy CEO  
Group Chief Operating Officer (COO) &  
International Activities  
Representative of the Management of  
Eurobank

D. Chamilaki  
Head, Group Sustainability/Environmental &  
Social Affairs Division

## 2. ABOUT EUROBANK

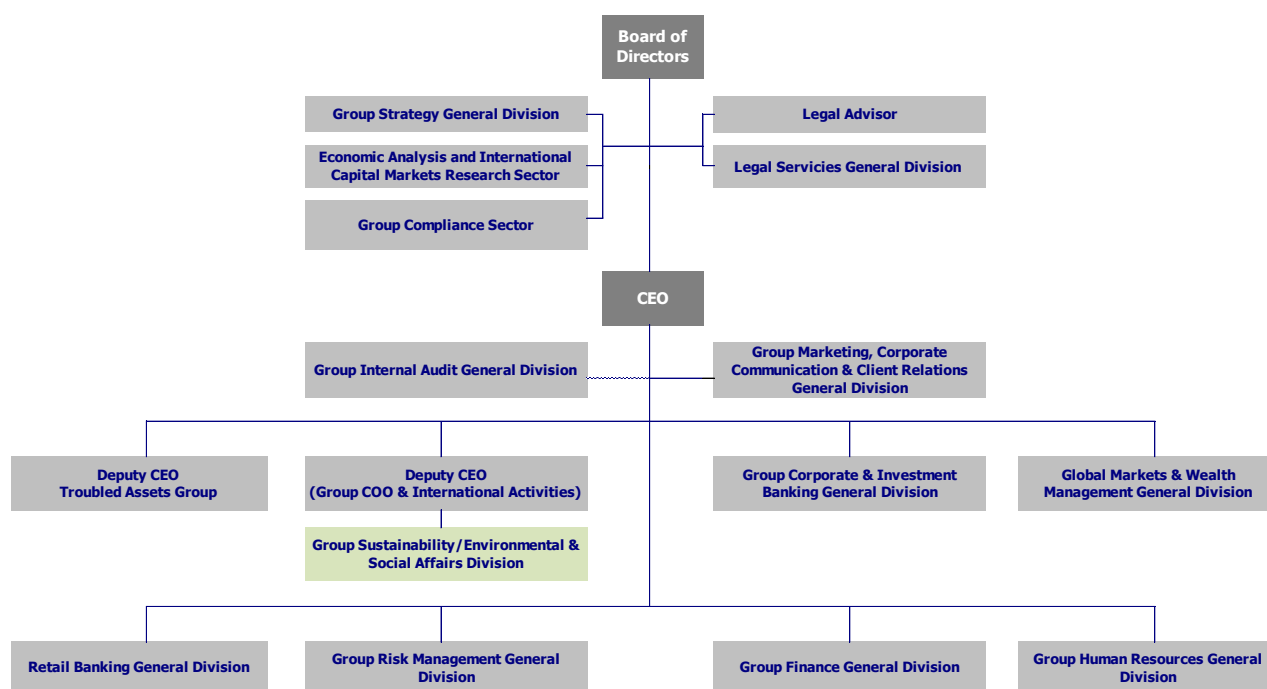

The Eurobank group is a dynamic financial organisation with operations in eight countries, total assets of €72.7 billion, and a workforce of 16,369 people. It launched operations in 1990, and, following a dynamic process of organic growth and mergers it has, in the past few years, been playing a leading role in developments in, and the shaping of, the domestic banking environment.

With an overall network of more than 900 customer service points in Greece and abroad, the Group offers a comprehensive range of financial products and services to retail and business clients.

In Greece, Eurobank is one of the four pillars of the banking system. With two distinct branch networks, the Eurobank network and the New TT Branch Network, dedicated business centers, an independent private banking network, and award-winning electronic networks, Eurobank's philosophy is focused on the provision of high quality services to its clients.

The Group also holds a strategic position in Bulgaria, Romania and Serbia, is a key player in the field of wealth management in Cyprus, Luxembourg, and London, and also has a presence in Ukraine.

For more detailed information about the Bank and its activities, see the Annual Report 2015, at the Bank's website [www.eurobank.gr](http://www.eurobank.gr), while the organization chart is presented in the following graph:

## 3. ENVIRONMENTAL POLICY

Eurobank announced its official Environmental Policy in 2003, showing its commitment to reduce the direct environmental impacts from its operation, as well as the indirect impacts from the activities of its clients and suppliers. In its environmental policy, the Bank expresses its intentions, and the principles it is committed to, in

regard to environmental issues. The environmental policy has been communicated to the Bank's personnel, and is available to third parties, since it has been posted on its website, [www.eurobank.gr](http://www.eurobank.gr).

The Bank's senior management has set the following environmental policy:

Eurobank sets objectives and targets that are measurable and feasible. These environmental objectives and targets are annually evaluated in terms of effectiveness, and revised if necessary. The results concerning the Bank's environmental performance are included in its Environmental Report, which is available at [www.eurobank.gr](http://www.eurobank.gr), and is communicated to the Ministry of Environment and Energy (MINENV), as well as to the EMAS Office of the European Union.

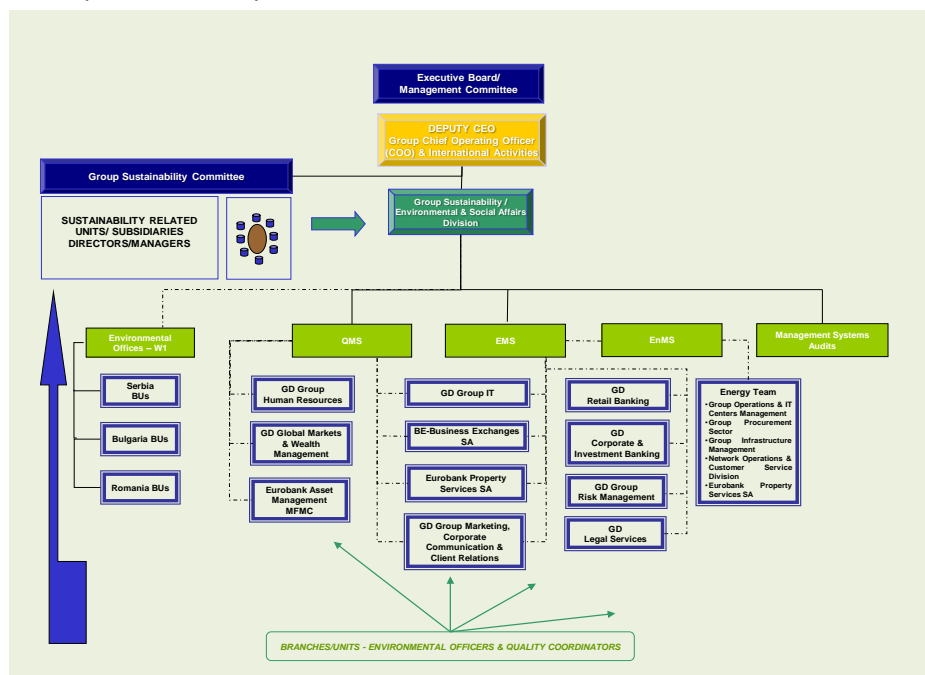

## 4. ENVIRONMENTAL MANAGEMENT SYSTEM

The Environmental Management System (EMS) of Eurobank is an integrated system for the comprehensive and sound management of all environmental issues that arise, or may arise, from the Bank's operation. For a description of the Environmental Management System (EMS) you may refer to the Environmental Report of 2011 (posted at the websites of the Bank and the MINENV)<sup>1</sup>.

The EMS implemented by Eurobank is based on the EMAS guidelines, and aims at ensuring compliance with the Environmental Policy within the scope of the Bank's operations. Moreover, it is based on a specific Structure and Organization, as well as on established procedures for monitoring, measuring and recording environmental performance in the immediate, and wider, environment within which the Bank operates.

In this respect, the Management of Eurobank has appointed the Deputy CEO, Group Chief Operating Officer (COO) & International Activities as its representative on environmental issues, in order to ensure the coordinated and responsible promotion and implementation of the Environmental Policy and the EMS in all locations and units of the Bank. The Group Environmental & Sustainability Committee reviews the Environmental Management System, and responsibility for the implementation of the Environmental Management System lies with the Group Sustainability/Environmental & Social Affairs Division, while the channels of communication with the Management, as well as with other Departments and Divisions, are illustrated in the nearby Environmental Management Organization Chart.

The Management believes that the successful implementation of the EMS calls for the realization of the basic principles related to the protection of, and respect towards, the environment, which eventually leads to the personal, actual involvement of each employee.

<sup>1</sup> <https://www.eurobank.gr/online/home/genericnew.aspx?code=EKEFrontidaGiaToPeribalon&mid=858&lang=en> & <http://www.ypeka.gr/Default.aspx?tabid=577&language=el-GR>

## 5. ENVIRONMENTAL ASPECTS AND IMPACTS

The environmental aspects of the Bank are described in detail in the Environmental Report 2013, which is available at [www.eurobank.gr](http://www.eurobank.gr). As of 2015, the management of the “Electricity consumption by lighting, electronic equipment, air conditioning, ventilation and chemical energy” aspect, is carried out through the Energy Management System, certified in accordance with the ISO 50001:2011 standard.

## 6. ENVIRONMENTAL OBJECTIVES, TARGETS AND PROGRAMMES

Environmental objectives and targets that correspond to the environmental aspects and aim at continually improving the Bank's environmental performance are set each year. In order to achieve these wider objectives, as well as the specific quantitative targets, the Bank designs and implements environmental programmes. The Bank's objectives, targets and implementation programmes for 2016 are modified as follows:

No	Objectives	2016 targets	Implementation Period	Environmental Programmes (EPs)
1	Natural Resource savings	Reduce energy consumption by 10%	31/12/2016	Energy Management System (ISO 50001).
2	Reduction of gas emissions	Reduction of total greenhouse gas emissions (GHG – Scope 2) by 10%, base year 2014.	12/31/2020	Energy Management System (ISO 50001).
3	Reduction of gas emissions	Reduction of total greenhouse gas emissions (GHG – Scope 1 & 2) by 10%, base year 2014.	12/31/2020	Energy Management System (ISO 50001).
4	Natural Resource savings	Paper Supply: 535 tons	12/2016	Paper saving program.
5	Minimization of waste	Paper recycling at all points of presence of the Bank	12/2016	Paper & packaging materials recycling programme (use of municipal infrastructure or recycling contractors).
6	Minimization of waste	100% toner reuse/recycling	12/2016	Managed Print Services.
7	Minimization of waste	100% light unit/battery recycling	12/2016	Light unit/battery recycling programme.
8	Minimization of waste	100% recycling of other waste electrical and electronic equipment	12/2016	Waste Electrical & Electronic Equipment recycling programme.
9	Raising awareness on environmental issues	To raise the environmental awareness of the employees and the public	12/2016	Participation in, or collaboration for organizing voluntary environmental activities.

## 7. ENVIRONMENTAL PERFORMANCE

The direct and indirect environmental impacts from the Bank's operation are reflected on the published data concerning environmental performance. This way, Eurobank ensures both transparent operation, as well as the enhancement of the effort to continually improve its "Environmental footprint", as part of a detailed mechanism of material and resources flow analysis and management within the Organization, which includes "green" procurement, the use of materials and the disposal of waste. In order to ensure that the Bank's environmental performance is comparable to that of the rest of the financial sector, special indicators have been developed on the basis of internationally accepted standards and Directives.

### 7.1 Environmental Performance Indicator

The EMS keeps analytical data on the environmental performance of Eurobank. In brief, the environmental performance for 2015 (January 2015-December 2015) is the following:

ENVIRONMENTAL INDEX	ENVIRONMENTAL PERFORMANCE		Y-o-Y (%)
	2014	2015	
Number of employees (persons)	8,692	8,674	-0.21
Total Area (m <sup>2</sup> ) (buildings and branches)	355,755	348,006	-2.18
Water consumption (m <sup>3</sup> )	86,204	85,200	-1.16
Water consumption per employee (m <sup>3</sup> /employee)	9.92	9.82	-0.96
Power consumption (kWh)	66,553,823 <sup>2</sup>	59,005,476	-11.34
Electricity consumption per employee (kWh/employee)	7,657	6,803	-11.15
Electricity consumption per area unit (kWh/m <sup>2</sup> )	187.08	169.55	-9.37
CO <sub>2</sub> emissions from electricity consumption, in tn	47,918.75	40,395.76	-15.70
CO <sub>2</sub> emissions from electricity consumption, in tn per employee	5.51	4.66	-15.43
Paper Supply (kg)	574,138	548,939	-4.39
Quantity of recycled paper (kg)	173,401	117,879	-32
Toner supply (units)	3,713	823	-
Number of toner cartridges recycled/refilled (units)	4,409	1,082	-
Batteries delivered for recycling (kg)	4,219	2,767	-
Recycling of portable batteries (kg)	562	465	-
Light units recycled	12,472 & 425 Kg	2,036 & 250.60 Kg	-
Quantity of power generator lubricants replaced (Kg)	120	1,400	-
Number of employees trained, to date <sup>3</sup>	3,291	3,539	7.54
Employees trained on environmental issues since the beginning of the EMS's implementation, as a percentage of the total workforce (%)	37.86	40.80	7.76
Environmental sponsorships (€)	50,000	60,000	-

ENVIRONMENTAL INDEX	ENVIRONMENTAL PERFORMANCE		Y-o-Y (%)
	2014	2015	
Number of active “green” banking products <sup>4</sup>	6	6	-
Recycling of electronic / electrical equipment (Kg) <sup>5</sup>	120,020	132,180	-
Electronic equipment donated (units) <sup>6</sup>	976	1,809	-
Number of environmental due diligence inspections at projects and/or businesses prior to loan/investment approvals	4	4	-
Number of post-approval environmental due diligence inspections at projects and/or businesses	15	18	-
Total CO <sub>2</sub> emissions, in tn	48,797.43	41,333.30	-15.30
Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO <sub>2</sub> e), in tn	48,797.50	41,335.57	-15.29
Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO <sub>2</sub> e), in tn/employee	5.61	4.77	-15.12
Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO <sub>2</sub> e), in tn per area unit	0.14	0.12	-13.41
Heating oil consumption (lt)	48,127	42,204	-12.31
Heating oil consumption per employee	5.54	4.87	-12.13
Heating oil consumption per area unit heated by heating oil	2.66	2.33	-12.31
CO <sub>2</sub> emissions from the consumption of heating oil, in tn	134.92	118.20	-12.39
Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO <sub>2</sub> e), in tn, Scope 1	641.90	649.39	-1.17
Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO <sub>2</sub> e), in tn, Scope 2	47918.75	40395.76	-15.70
Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO <sub>2</sub> e), in tn, Scope 1 and Scope 2	48560.65	41045.14	-15.48
Natural gas consumption (kWh)	2,510,195	2,619,113	4.34
Natural gas consumption per area unit heated by natural gas (kWh/m <sup>2</sup> )	48	50	4.34
CO <sub>2</sub> emissions from the consumption of natural gas, in tn	507	529	4.34
Carbon intensity (tnCO <sub>2</sub> e/€ million in revenues)	42.07	27.85	-33.79
Percentage of Ecolabelled A4 paper supplies	100%	100%	-

2 – Based on actual energy consumption in 2014, which amends the corresponding figure presented in the 2014 Report (68,280,149 kWh), which included the relevant forecasts.

3 – Each year, a scheduled training cycle is offered to Bank employees

4 – Active Green products comprise the following:

- WWF Visa Card
- Customer e-statements
- Green Housing Loans
- Investments in photovoltaic systems
- Infrastructure projects for electricity generation from RES, natural gas.
- Participation in environmentally aware enterprises, through Special Purpose Vehicles

5 – Total non-operative units are forwarded for recycling

6 – Still-operational used equipment is donated

## **7.2 Environmental Management**

The Bank's EMS includes programs and initiatives divided into six sectors:

1. Personnel Training/Information and Awareness
2. Natural resource (such as paper and electricity) savings
3. Recycling and waste management
4. Reduction of Greenhouse gas emissions
5. Environmental risk assessment of client financing
6. Development and promotion of “green” banking products

### **7.2.1 Personnel training, updating and awareness**

Eurobank actively promotes awareness-raising among employees, encouraging them to be active on environmental issues through, for instance the identification of personnel training needs on Environmental Management. The Bank acknowledges that raising personnel awareness is crucial for the successful implementation of the Environmental Management System.

In order to train its employees on its Environmental Management System, the Bank has been implementing an e-learning programme, which was attended by 248 people in 2015, changing the ratio of environmentally trained employees to 40.80% of the workforce. Among other things, e-learning contributes to reducing trainee commutes, further reducing greenhouse gas emissions.

Moreover, the Bank's Intranet includes a page especially dedicated to the continuous updating of personnel on environmental management issues, while certain individual issues pertaining to the Bank's environmental programmes are regularly communicated to the employees, improving both information and involvement.

## 7.2.2 Natural resource savings

### 7.2.2.1 Energy and climate change

Despite the fact that the Bank's contribution to the greenhouse effect mainly concerns indirect gas emissions (through electricity consumption), the significance of Climate Change makes monitoring energy consumption of all types, and the corresponding emissions, one of our top priorities.

Since 2008, the Bank has been using the internationally accepted Greenhouse Gas Protocol (GHG) (<http://www.ghgprotocol.org/>), for monitoring its Energy-Saving Programme. This Protocol provides a framework for recording and allocating energy consumption, as well as for calculating direct and indirect Greenhouse gas emissions.

Direct consumption refers to the combustion of oil and natural gas for heating purposes. Indirect consumption refers to the use of electricity for the Organization's operations. The corresponding Greenhouse gas emissions are divided to direct (Scope 1) emissions from oil and natural gas combustion, and to indirect emissions from the electricity bought by the Bank (Scope 2), as well as emissions corresponding to the business trips of employees (Scope 3).

In 2015, the total consumption of heating oil amounted to 42,204 litres, natural gas consumption amounted to 2,619,114 kWh, electricity consumption amounted to 59,005,476 kWh, while business air travel reached a total of 1,952,406 miles. In 2015, total electricity consumption was reduced by 11.34% as compared to 2014 (66,553,823 kWh), i.e. the target that had been set (See Environmental Report 2014, page 8, 1st target) was overachieved.

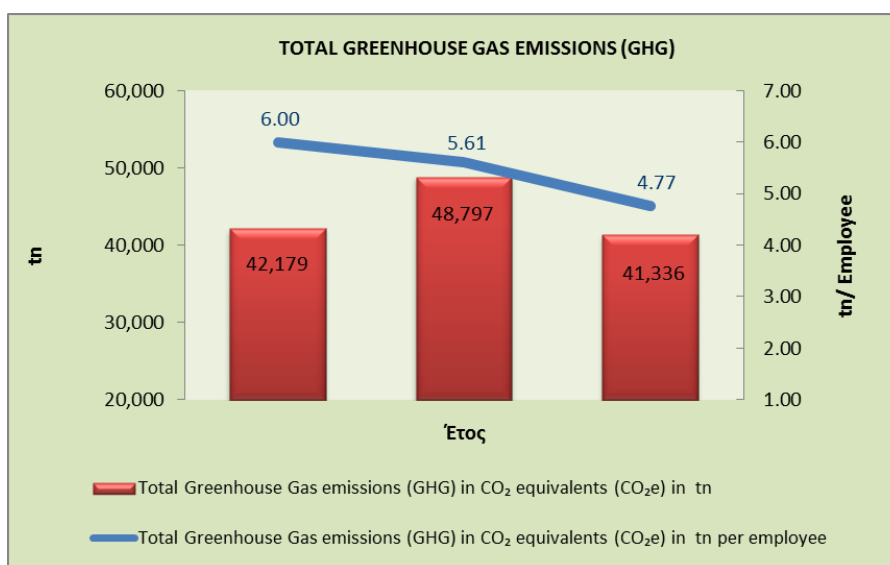

Electricity consumption per employee amounted to 6,803 kWh/employee, as compared to 7,657 kWh/employee in 2014, reduced by 11.15%.

Energy management and the monitoring of the relevant indices aim at taking the appropriate decisions concerning interventions that will minimize the Bank's share in the Greenhouse effect and Climate Change. As part of the effort to reduce direct greenhouse gas emissions from the combustion of oil for heating purposes, we developed infrastructures for gradually introducing the use of natural gas in Administration buildings, anticipating, at the same time, an improvement in the performance of the relevant heating systems by 5-10%.

Moreover, in 2015, based on the findings of the consumption monitoring project, interventions were made to both the existing equipment and to the design of the new premises' concerning internal lighting, illuminated signs, air conditioning and electrical installations.

Total CO<sub>2</sub> emissions were reduced by 15.30% year-on-year, and amounted to 41,333 tons, as compared to 48,797 in 2014. Similarly, total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO<sub>2</sub>e) amounted to 41,335.57 tons. Total greenhouse gas emissions (GHG) in carbon dioxide equivalents (CO<sub>2</sub>e) stood at 0.12 tons/m<sup>2</sup> per area unit, and 4.77/tn per employee, reduced by 13.41% and 15.12% respectively as compared to 2014.

In detail, the contribution of greenhouse gases (carbon dioxide, methane, nitrous oxide) in total emissions, as well as the annual gaseous pollutant emissions from the use of oil and natural gas for 2015, were the following:

CO <sub>2</sub> e breakdown (tn)*				Analysis of atmospheric pollutants (tn)		
From CO <sub>2</sub>	From CH <sub>4</sub>	From N <sub>2</sub> O	Total CO <sub>2</sub> e	From SO <sub>2</sub>	From NO <sub>x</sub>	Particles
41,333.30	1.77	0.50	<b>41,335.57</b>	0.030	0.450	0.029

\*The measurement of other greenhouse gases (in CO<sub>2</sub> equivalents) is based on the GHG protocol spreadsheets.

The year 2015 was a landmark for Eurobank's energy management, since, by expanding and specifying the Environmental Management System it has been implementing, and as part of its focus on constantly improving its energy efficiency, it became the first Bank in Greece to develop and implement an ISO 50001-certified Environmental Management System.

As part of this system, the Bank has established, and is implementing, specific Energy Management Policy and procedures, which include the monitoring and analysis of energy consumption, with the aim of implementing technical interventions and administrative solutions wherever necessary, on the basis of scientific methodologies for documenting anticipated improvements in energy efficiency.

This leads to the reduction of energy consumption and, consequently, of greenhouse gas emissions. The methodology implemented by Eurobank with the purpose of diminishing its energy consumption requirements, is based on the "Pay as you save" model, in collaboration with Eurobank Property Services being the Energy Services Company-ESCO, as part of a "Shared Benefit Energy Performance Contract". The major interventions made in 2015, in both the existing equipment, and the design of new premises, concerning internal lighting, illuminated signs, air conditioning, electrical installations and natural gas facilities, were the following:

#### **a. Lighting**

In 2015, new lighting appliances, featuring energy-saving technology (T5 fluorescent lamps, 4x14W and electronic ballasts) were installed in all the branches and premises that underwent extensive repair-

renovation works. The reduction of lighting energy consumption is estimated at 25%, at least as compared to the type of lighting appliances that was used till now.

Moreover, in the underground garage of the Tavros building (25th of March & Teo Streets) the existing T16 light units (almost 950 units) were replaced by new CE-certified, A+ energy class, 1200mm LED Osram DS-ST8-HB4 light units. In addition, the existing gu10 lighting spot units were replaced by LED Osram Parathom ones.

### **b. Illuminated signs**

In 2015, the Bank completed the replacement of the NEON and fluorescent units of the branch network's illuminated signs by LED light units.

### **c. Air conditioning**

The branch network and office buildings of the Branch have been fitted with energy-saving air conditioning systems, which can also improve conditions in the corresponding premises, thus improving their ventilation, apart from covering cooling-heating needs. More specifically, the new air conditioning systems installed in 2015 concerned:

- a) Variable Refrigerant Flow (VRF) Systems, which were combined with air to air exchangers that enable the pre-cooling of external ("fresh") air with low energy consumption.
- b) Split-type autonomous air-conditioning units, with inverter controls, of high energy class (A or B+), using environment-friendly Freon R410a and showing high coefficients of performance.

The units were installed in the branches of P. Faliro (c. 035), Ag. Varvaras Psychiko (c. 036), Trikala (c. 123), Komotini (c. 140, New building), Faliraki Rhodes (c. 163 – branch extension), Ag. Nikolaos Crete (c. 169), Varkiza (c. 189), Aliveri (c. 279), Panormou (c. 303-former 752, merger), Grevena (c. 337 - merger), Zarouchleika (c. 344), Stratigou Kallari (c. 351), NTT Kesarianis (c. 640), Akti Miaouli (c. 440-former 655, merger), NTT Nikaia (c. 660), NTT Kastoria (c. 712), NTT Mytilini (c. 725), NTT Kalamata (c. 729 - extension), as well as the Bank's offices in the building of 8 Othonos Street.

### **d. Improving the performance of electrical installations**

In addition, in 2015 the Bank carried out an inspection of the indoors electrical installations of its branch network and administration premises, in accordance with the EL0T HD 384 standard.

### **e. Energy saving campaign**

In 2015 the Group realized an internal energy-saving campaign titled "Good Energy — Don't waste it, use it for something good", which aims at significantly raising personnel awareness, by combining the environmental with the social gains and incentives, since it also provided for making a monetary donation in order to heat the Lyreion Children's Foundation.

The campaign comprised the following actions:

- Communication of the campaign through a special banner on the Group's intranet site, e-mails to all personnel, and periodic reminders of the Ten Energy-Saving Tips via e-mail.
- Placement of special energy-saving stickers in all administration buildings and branches, next to light and air conditioning switches and Managed Print Service devices, as a permanent incitement to use energy properly.
- Distribution of a quarterly Newsletter containing data on the energy-saving campaign, as well as other environmental subjects.

#### **f. Other energy-saving measures**

Along with the above measures, the Bank continued to provide its employees with information about energy-saving issues, as follows:

- Distribution to all branches of a special Environmental Questionnaire, which enables employees to comment on both environmental and energy-related issues.
- Provision of information to the branches, through the Environmental Management Guide, which includes the “Ten Energy-Saving Tips” that comprise simple environmental practices and guidelines.

#### **Distinction for the Eurobank group at the Energy Mastering Awards**

In 2015, the Bank participated in the “Energy Mastering Awards” competition, winning three (3) Gold Awards in the “ISO EN 50001 Certification”, “Energy Conservation”, and “Energy Efficiency” categories. This distinction is an additional recognition of the Bank's initiatives and efforts, as well as its overall approach to the crucial sector of energy management and conservation.

#### **Building LEED (Leadership in Energy & Environmental Design) certification**

The Bank joined the initiative of the company (GRIVALIA Properties) that owns its Tavros premises (March 25th & Teo Streets), to have the building LEED Platinum-certified. This is the first office building in Greece to earn such a certification, highlighting Eurobank's perfect working environment. The Bank's contribution in terms of provision of information and coordination was decisive. By already implementing its certified Environmental and Energy Management Systems throughout its entire range of operations, the Bank was the ideal tenant, fully supporting the owner's efforts to earn this certification.

#### **Planning for 2016**

The responsible Services of the Bank are planning the following activities during 2016:

a) Continuation of the following actions in all the Bank's new Branches and office spaces, as well as all areas where extensive refurbishment works are implemented:

- installation of environment-friendly roof-lighting appliances, with T5 light units and electronic ballasts
- installation of LED illuminated signs
- installation of VRF air conditioning systems, and autonomous air-conditioning devices, as well as installation of air-cooled water air-conditioning systems, of energy class A
- installation of a heat recovery ventilation system

b) Preparation of technical inspection reports concerning branches and administration buildings selected from the Bank's annual power consumption data list, in collaboration with Eurobank Properties Services (EPS). The inspections will be performed as part of the Shared Savings Energy Performance Contract with EPS for the Energy Efficiency Optimization of Eurobank's buildings and branches, which, for the entire 2016, provides, among other things, for the analytical recording of the consumption profile of each space, the installation of meters at each point of measurement, the identification of the equipment or functions in need of immediate improvement, the implementation of interventions, the monitoring of consumptions etc.

c) Scheduling of energy-saving actions in branches/buildings as part of the Shared Savings Energy Performance Contract with EPS.

d) Realization of interventions in the electromechanical equipment and inspection of facility operation in buildings and branches that have been given priority by EPS:

- MOSCHATO building
- N. IONIA complex
- PHILELLINON Street building
- THESSALONIKI Street building
- ATHINAS Street building
- BODOSAKIS building
- 5 SANTAROZA Street building
- 10 Branches

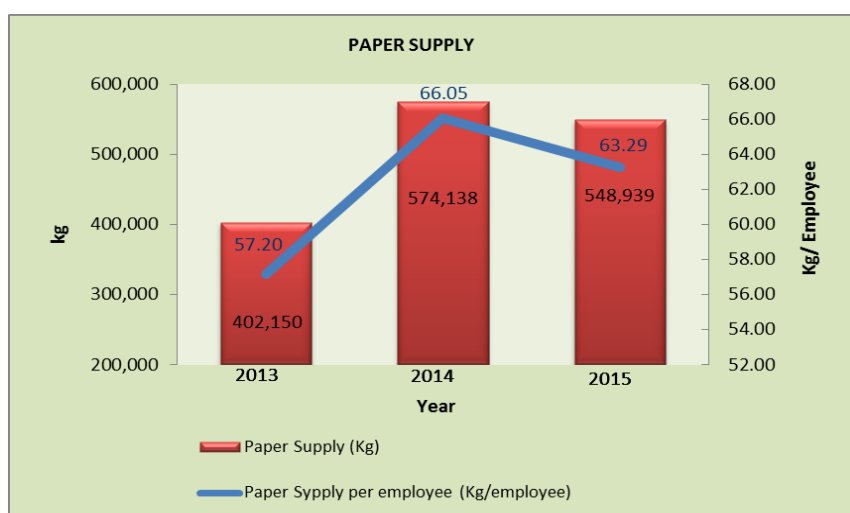

e) Specific inspection of the infrastructures and re-configuration of the operation of the E/M equipment that serves the Nea Ionia Data Center:

- Installation of an energy monitoring and management system at the rack areas (Area 1, Area 2, Networking) of the Data Center.
- Design, analysis and evaluation of a system that uses low external air temperatures to assist in the operation of air-conditioning installations during the winter (free cooling) with the aim of ensuring the more effective/efficient use of air-conditioning in the Data Center.
- Air flow optimization in rack areas.
- Extension of existing BMS points, utilization of monitoring data.
- Retrofitting of the buildings' A/C systems compressors and water pumps with inverter-based speed controllers.
- Retrofitting of the buildings' cooling equipment with temperature compensation systems.

f) pilot replacement of halogen lights with new LED-technology lamps in lighting appliances of the Bodosakis Building.

### 7.2.2.2 Paper

The rationalization and control of paper consumption is one of the Bank's major environmental targets. In this context, annual paper supplies were reduced by 4.39% year-on-year in 2015, to 548,939 kg., i.e. the 550 ton target that had been set for 2015 (See Environmental Report 2014, page 8, 2nd target), was achieved. Moreover, annual paper supplies per employee decreased by 4.19%, to 63.29 kg, as compared to 66.05 kg per employee in 2014.

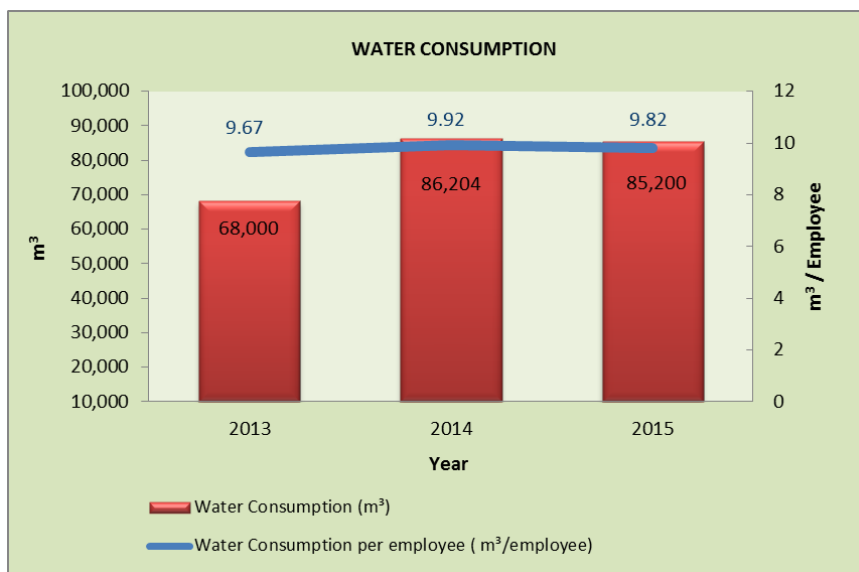

The paper consumption-reducing actions realised by the Bank, which are described in detail in the Environmental Report 2013, are continued till today.

### 7.2.2.3 Water

Water is the most important natural resource of our times, and for this reason the Bank attaches great importance to its preservation. Water-saving measures include the installation of air-cooled air conditioning systems, which consume less water. In 2015, water consumption amounted to 85,200 cubic meters, representing a year on year reduction of 1.16 %. In addition, the water consumption per employee indicator was reduced by 0.96%, to 9.82 m<sup>3</sup>/employee, as compared to 9.92 m<sup>3</sup>/employee in 2014.

The Bank has set the target of rationally reducing water consumption, stabilizing it at 9 m<sup>3</sup>/employee per year.

### 7.2.3 Recycling and solid waste management

The Bank makes every possible effort to recycle and/or redirect all types of solid waste. All waste, depending on type, is collected in the appropriate bins or at especially designated areas, to be delivered either to the suppliers of the original materials, or to licensed waste management contractors.

Our effort begins with the prudent supply of materials whose waste has limited environmental impacts, such as dry batteries or asbestos-free refurbishing materials.

Today, the Bank is following up on waste streams, in order to ensure their best possible management and the reduction of environmental impacts.

Therefore, the Bank has been monitoring and managing the lifecycle of the following materials within the organization:

1. Toner cartridges
2. Paper and Packaging Materials
3. Waste Electrical & Electronic Equipment
4. Light units
5. Batteries
6. Credit Cards

The permanent objective of the Bank is to continue expanding its recycling programmes in order to ensure the safe management of all outgoing recyclable materials.

### ***Toner cartridges***

The toner cartridge management programme is described in the 2013 Environmental Report. In 2015, total toner supply amounted to 1,082 units, as compared to 3,713 in 2014. This 77.83% reduction is due to the extension of the “Managed Print Services” programme to the entire Bank during 2015.

Total toner cartridge supply per employee amounted to 0.09 units/employee in 2015, while recycling/refilling concerns 100% of blank toner cartridges, through the relevant management mechanism, thus leading to the achievement of the relevant target that had been set for 2015 (see Environmental Report 2014, page 8, 4th target).

The aim is to ensure the smooth implementation of the Managed Print Services programme all over the country, as well as the 100% safe management of blank cartridges.

### ***7.2.3.2 Paper and packaging materials recycling***

The paper recycling programme was revised in 2014, the main change being the inclusion of the use of municipal recycling systems along with the choice of contractor for the management of paper and packaging materials.

The total quantity recycled by the recycling contractor during 2015 amounted to 117 tons, and accounted for 21.47% of paper supplies for the year.

However, the actual quantity is much larger, since there are no measurements of the quantities channeled to municipal recycling systems, which account for more than 70% of the branches; that said, the target that had been set for 2015 (see Environmental Report 2014, page 8, 3rd target) is achieved.

Finally, 0.24 tons of packaging materials (plastic, aluminum, paper) were recycled.

### ***7.2.3.3 Electrical & Electronic Equipment***

In 2015, the Bank continued its programme for the safe disposal of waste (electrical & electronic) equipment either through reuse (within the Bank's units) and donations to third bodies, or through the recycling of any devices that cannot be reused. Recycling is carried out in cooperation with the official system established by the Ministry of Environment and Energy, and its pertinent licensed associates. Almost 132,180 kg (7,043 units) of equipment were recycled in 2015, accounting for 100% of waste equipment and leading to the achievement of the target that had been set (see Environmental Report 2014, page 8, 6th target). Moreover, the Bank continued its successful electronic equipment donation programme, as part of an effort to manage the life cycle of the materials it purchases. Thus, in 2015 it donated 1,809 electronic equipment items.

### ***7.2.3.4 Lamps/Batteries***

Used light units and batteries are types of waste that are regulated by the applicable environmental legislation. Their safe disposal prevents the pollution of both the soil and aquifer with heavy metals and other hazardous substances. In 2015, the Bank continued its cooperation with the agencies qualified for managing such materials. Overall, 2,036 units and 250.60 kg of burned-out light units were delivered for safe disposal.

In addition, batteries weighing a total of 2,767 kg were delivered for safe management, including large/medium UPS batteries. Portable batteries were also collected (through AFIS), leading to the recycling of a total of 465 kg.

The target of recycling 100% of waste light units and batteries was achieved in 2015 (See Environmental Report 2014, page 8, 5th target).

#### 7.2.3.5 Credit Cards

The credit cards that have expired or have been canceled and are returned by our customers constitute non-hazardous materials that we are managing. In 2015, almost 2,260 kg of destroyed cards were delivered for recycling. The target for 2016 is to manage 100% of the expired or canceled credit cards returned by our customers.

#### 7.2.4 Environmental risk assessment

In 2015 the Group carried out a share capital increase, with the dynamic involvement, as in the case of all Greek systemic banks, of major institutional investors, such as the European Bank for Reconstruction and Development (EBRD) and the World Bank through the International Finance Corporation (IFC).

These internationally prestigious institutions have been instrumental, through their established mechanisms and conditions for financing the economy, in highlighting the importance of incorporating environmental and social risk management mechanisms into the banking sector's lending and investment operations.

As an organisation that is constantly improving its in-house know-how on such issues, Eurobank was prepared to upgrade its pertinent mechanisms for identification and management of potential credit, operational and legal risks as well as reputational risks that could derive from the clients' environmental and social behaviour, in order to generate the fewest possible repercussions to the Greek economy, but also through developing conditions to highlight major opportunities for strengthening environmentally and socially responsible entrepreneurship.

In this context, 4 environmental due diligence inspections were performed in 2015 prior to the approval and disbursement of loans. Similar inspections were also performed as part of monitoring the financed projects (18 environmental inspections).

In 2016, the Bank will continue these environmental inspections, actively contributing to environmental protection.

#### 7.2.5. "Green" Procurement Policy

Since the launching of its Environmental Management System, the Bank has stated, through its policy, that it wishes to transmit its environmental culture to its customers and suppliers. In this context, it has been gradually developing environmental criteria for evaluating both its suppliers, and the products and services they offer.

The existence of an environmental policy, as well as Environmental and Energy Management Systems has already been incorporated to the supplier evaluation criteria, while environmental labels (such as Energy Star, FSC, PEFC, Eco-Label etc.), are included in product specifications whenever practically possible. In this context, the following instruments were also updated:

- Environmental specifications of key procured items  
Development of the criteria and the corresponding ratings for each type of product, for the evaluation and selection of green products by procurement officers.
- Green procurement evaluation method  
Including tables with technical specifications for the evaluation of supplies/suppliers.

In addition, adherence to the environmental legislation is an explicit provision in all contractor agreements.

The Group's Procurement Policy includes special environmental regulations that promote sound environmental conduct among suppliers and ensure, whenever possible, the selection of environment-friendly products.

It should be noted that the Bank's "Green" Procurement Policy is seriously taking into account the peculiarities of the market, and aims at utilizing the Bank's purchasing power in order to positively push the market towards the provision of environment-friendly products and services, without causing disturbances and unfair competition.

### **7.2.6 "Green" banking products/services**

The Bank has developed "green" banking products, which have a positive impact on the environment. Products such as the WWF Eurobank Visa and the "Green" Home Loans are supported by specialized financing programmes.

Moreover, Eurobank Equity Partners, the Group's subsidiary, has developed and has been promoting a major investment product which, among others, supports dynamic companies of the Green Growth sector.

#### **WWF visa**

WWF Eurobank Visa is the first "green" product ever issued by a Greek bank, and it is the outcome of the partnership between Eurobank and WWF Hellas, which began in 2000. Up to this date, WWF Hellas has received more than €2.01 million through WWF Eurobank Visa, in order to finance its environmental protection activities.

In 2015, the total number of active WWF Visa cards stood at 25,600, while Eurobank paid WWF Hellas the amount of €45,000, which once again came from:

- i. the one-off payments for each issuance and renewal of WWF Eurobank Visa cards
- ii. the payment of a percentage on the value of purchases made by cardholders, without any charge to the latter

The amounts paid each year to WWF Hellas enable this organization both to preserve its independence and continue its work unhindered. The amount paid in 2015 was put to the following uses:

#### **Scientific support**

Financing of important actions that provide scientific support to WWF's fieldwork, in regard to environmental policy issues, as well as communication (maps that highlight the problem of forest fires, maps recording the existence of lignite stations in Greece, ecological value of the coastal zone).

#### **Oikoskopio**

Maintenance and technical support of both the Greek and English versions of this web application, for the enrichment of Oikoskopion with new data, and for the addition of new games to the Oikoskopion kids site.

#### **Dadia Forest National Park Programme**

Financing of the study that the Dadia Forest team prepared in order to offer its own assessment and opinion on 5 wind farm environmental impact studies in Thrace, in conjunction with the organisation's proposal for the proper zoning of wind farms in the region.

#### **Legal support voluntary team**

Support to the policy researcher who, together with a team of 15 volunteers from diverse scientific backgrounds (lawyers, engineers, environmentalists), provides citizens with environmental information and advice in regard to environmental deterioration cases, such as industrial pollution, illegal logging etc.

### **Management of the Sekania Beach, Zakynthos**

Financing, for another year, of part of the actions and campaigns in which the organisation is involved both as a member and as a co-organizer (in collaboration with other NGOs and the National Marine Park of Zakynthos) at the most important nesting beach of the loggerhead sea turtle in the Mediterranean.

## **“Green” Home Loans**

Eurobank has significantly contributed to energy-saving actions, and specifically to the improvement of the energy efficiency of Greek homes, through its active participation in the “Saving at Home” programme. The “Saving at Home” programme was launched in February 2011 and attracted considerable demand throughout its duration, also significantly contributing to the achievement of Greece's environmental targets, as it financed the improvement of the energy efficiency of almost 45,000 homes all over the country. The Programme was co-financed by the European Union (through the NSRF programme), the Greek State and the Banks, and provided citizens with substantial incentives (subsidies of up to 70% of renovation works and interest-free loans) for carrying out energy-saving home improvements. The first cycle of the Programme ended on 12/31/2015.

Thus, a major priority for the Bank in 2015 was the successful completion of the “Saving at Home” Programme. By means of this Programme, Eurobank provided financing to a total of almost 10,000 households that improved the energy efficiency of their homes by at least one energy performance classification grade, thus achieving average energy savings of 40% and generating long-term economic gains from the reduction of family expenditure for heating/cooling and hot water usage.

The programme's beneficiaries were served by the Sales Networks and the Branches of the Eurobank and New TT Hellenic Post Bank Networks, and were provided with the necessary information and support during all the stages of the process, in order to join the Programme and complete their energy-saving home improvements.

Moreover, apart from this State-subsidized programme, Eurobank also offered a range of cutting edge products under the “Green Home Loan” label; these loans are granted with or without underwriting a mortgage, in order to finance any Green energy-saving interventions a citizen needs to carry out in an owned property (for example, from the installation of photovoltaic systems for electricity generation at home –net metering– and the complete replacement of heating systems, to the complete refurbishment of homes for energy-saving purposes).

In conclusion, our invaluable experience and expertise in the field of “Green” loans will always provide a springboard for further initiatives, with the ultimate goal of actively contributing to both the achievement of the government's environmental targets and the protection of the overall environment, through the design of “green” banking products that offer the most beneficial financing solutions, covering all the citizens' possible “green” home improvement requirements.

## **Financing of infrastructure projects for electricity generation from RES and/or other environment-friendly energy sources**

In the past few years, the Bank has shown an unwavering commitment in supporting investments in the field of renewable energy sources (RES), which is part of the greater goal of financing the economy and supporting the country's growth.

The Bank has created special lending products for financing RES investments undertaken by small and medium-sized enterprises, such as PVs in business premises or rooftops, and PV parks and wind farms with installed capacities of up to 5 and 15MW respectively, also supporting large RES investments through more complex banking products, which cover the needs of large enterprises, emphasizing on structured Project Finance deals.

The Bank is also engaged in financing other environment friendly investments, by financing projects for the generation of electricity from natural gas, which aim at replacing older polluting stations.

The Bank's target for 2016 is to expand its RES project lending portfolio and continue supporting Greek and foreign investors involved in this field.

### **e-Statement service**

The increase in the usage of the e-Statements service during 2015 was, once again, rather impressive, as 47% more e-Banking users chose to receive only electronic account statements. In total, 204.000 customers have discontinued the receipt of more than 579,000 physical statements over the conventional mail. The penetration rate of this service among active e-Banking users has reached 60%. The most important action that led to the discontinuation of the physical statements were the targeted e-Banking “splash screen” that appeared in front of all e-Banking users who had never discontinued at least one physical statement. Moreover, the savings for the Bank from the discontinuation of statement deliveries through conventional mail are also substantial and amount to more than €3.5 million since the service became available.

### **Participation in environmentally aware enterprises, through Special Purpose Vehicles**

The Bank is selectively participating, primarily with minority stakes, in companies with specific characteristics and strong growth prospects, emphasizing on extroversion and environmental awareness, and using, whenever necessary, co-investor funds. Apart, though, from financing capital, it also offers a wide range of advisory services and knowhow in regard to the development and growth of promising enterprises in Greece and abroad. In this context, the Bank has made the following investment:

#### **MESOGEOS SA.:**

In 2010, Eurobank, together with a co-investor from the private sector, founded SINDA, with the aim of acquiring a stake in the share capital of MESOGEOS SA.

The MESOGEOS group of companies is one of the largest groups in the field of environmental protection in Greece. It is operating in the water and solid waste treatment markets, as well as in the sector of energy generation from RES. It is a leader in the Greek market and has established a presence in Great Britain, Cyprus, and Romania, while its products are available in many countries.

The group's operations cover the following sectors:

- Solid & liquid waste
- Water resources
- Polluted soil restoration
- Urban environment upgrade
- Renewable Energy Sources

Despite the adverse overall financial environment, the Group maintains a satisfactory backlog and continues to secure major projects, continuously participating in tenders in Greece and abroad. Moreover, the group secured the refinancing of its loans with improved terms, which is expected to boost liquidity, and is also considering wider strategic growth and restructuring issues.

### ***7.3 Corporate Social Responsibility and the Environment***

Apart from its business activity, the Eurobank group has been developing social responsibility initiatives, in response to the needs of the societies in which it is operating. It maintains long-standing relations with acclaimed agencies and organizations, in order to realize initiatives in the critical fields of Education, the Society, Culture, Young Entrepreneurship, and Sports. In the field of the Environment, Eurobank has, for the past few years, been steadily supporting the work of the Scouts of Greece, participating in green area cleanup, landscaping and preservation initiatives all over Greece.

## 8. EMAS VERIFIER CERTIFICATE IN REGARD TO VERIFICATION AND CERTIFICATION ACTIVITIES

**TÜV HELLAS (TÜV NORD) SA**, certified by the Hellenic Accreditation System with EMAS Verifier No. **EL-V-0004** and accredited for the scope of applications **1.61, 7 (except 7.21), 8.1, 8.91, 10, 11, 12, 13, 14.1, 14.3, 16, 18.1, 19, 20, 21, 22, 23, 24 (except 24.46), 25, 26.2, 26.8, 27, 28 (except 28.29, 28.96 and 28.99), 31, 32.3, 33, 36, 37, 38, 39, 41, 42, 43, 45, 46, 47, 49.42, 49.5, 52, 53, 55, 56, 58, 59.2, 61, 62, 63.1, 64, 65.1, 66.2, 68, 69.1, 70, 71.1, 72, 77.32, 79, 80, 81, 82.3, 84.11, 85, 86.23, 95, 96 (except 96.09)** (NACE code), confirms that the entire organisation referred to in updated environmental statement of the Eurobank Ergasias Group, registration number (EL-000080) conform to Regulation (EC) No. 1221/2009 of the European Parliament and the Council of November 25, 2009, on the voluntary participation of organizations in a Community eco-management and audit scheme (EMAS).

By signing this certification I declare that:

- the verification and certification conformed to Regulation (EC) No. 1221/2009;
- the verification and certification confirm that there were no indications of non-compliance with applicable legal requirements concerning the environment;
- the data and information contained in the updated environmental report of the organization provide a valid, reliable and accurate view of the activities performed by the organization, within the scope described in this environmental report.

This document is not equivalent to an EMAS registration. Only a competent agency can, pursuant to Regulation (EC) No. 1221/2009, can provide EMAS registration. This document can only be disclosed in conjunction with other documents.
