***II. Interim Directors' Report***

**Report of the directors**

---

The directors present their report together with the accounts for the six months ended 30 June 2011.

**Profit Attributable**

The profit attributable to shareholders of the EFG Eurobank Ergasias S.A Group (Eurobank EFG or the Group) for the first half of 2011, before taking into account the one-off impairment of Greek Government bonds following the voluntary debt exchange programme that will be launched shortly by the Hellenic Government, amounted to €76m. After the impairment of Greek Government bonds the Group recorded a loss of €588m (2010: €50m profit) as set out in the consolidated income statement on page 3.

**Greek Economy Liquidity Support Program (law 3723/2008)**

Eurobank EFG participates in the Greek Government's program to support liquidity in the Greek economy under Law 3723/2008, as amended (note 20 to the accounts).

**Greek Sovereign debt exchange programme**

On July 21, 2011 the Heads of State of Governments of the Euro Area and European Union (EU) institutions agreed to an integrated assistance plan for Greece, including a voluntary debt exchange programme for the Private Sector and a debt buy back programme (Private Sector Involvement - PSI). Eurobank EFG believes that, the implementation of these decisions will contribute to the improvement of Greece's debt profile, enabling the overall sustainability of the Greek sovereign debt, and allow Greece to focus on the key elements of its reform program and thus deliver a restructured, competitive economy. Eurobank EFG supports these programmes and envisages significant participation.

In response to the above decisions, and in accordance with International Financial Reporting Standards, on the assumption of a 100% participation and estimated interest rates, the Group recorded an estimated impairment loss on its Greek Government bond portfolio totalling €830m (€664m after tax).

**Merger of Eurobank EFG with Alpha Bank**

The Board of Directors of Alpha Bank and Eurobank EFG jointly announced on 29 August 2011, that they have agreed to recommend to General Meetings of their shareholders, the merger of the two Banks. The combined group will proceed with the implementation of a comprehensive capital strengthening plan, equivalent to €3.9 billion, targeting significantly enhanced capital buffers.

The suggested share exchange ratio is 5 new Alpha Bank ordinary shares for every 7 Eurobank EFG ordinary shares. The merger is expected to be approved by the Extraordinary General Meetings of the two Banks in November 2011, with completion of the legal merger effected by mid- December 2011.

## **Dividends**

Pursuant to Laws 3756/2009, 3844/2010 and 3965/2011, banks participating in the Greek Economy Liquidity Support Program are not allowed to declare a cash dividend to their ordinary shareholders for the financial years 2008 up to 2010.

In June 2011, the Annual General Meeting approved the distribution to the Hellenic Republic of the 10% preference dividend for 2010 amounting to €95m.

## **Activities and Regional Presence**

Eurobank EFG is a financial services provider engaged in retail, corporate and private banking, asset management, insurance, and treasury and capital markets services. The Group operates through branches, offices and subsidiaries in Greece and the region of Central, Eastern and South-eastern Europe (New Europe). Its regional presence is concentrated primarily in Euro – zone members (Greece, Cyprus, Luxembourg), European Union members (Romania and Bulgaria,) and candidate member nations (Serbia and Turkey).

## **Strategic Cooperation in Poland**

On 4 February 2011, Eurobank EFG announced a strategic cooperation in Poland, whereby 70% of Eurobank EFG's operations in Poland (Polbank EFG) will be transferred to Raiffeisen Bank International (RBI) and the remaining 30% will be exchanged for 13% in the to-be-combined Polbank EFG- RBI Poland operations. This initiative, which is expected to be completed in the fourth quarter of 2011, will improve the Group's Capital Adequacy Ratio by 125 bps, release approximately €2bn of liquidity, generate profitability and maintain a meaningful upside in the attractive Polish banking market.

Based on the terms of the Investment Agreement with RBI, in March 2011 Eurobank EFG proceeded with the derecognition of its Polish operations for a total consideration of €718m (note 8 to the accounts).

## **Financial Results Review <sup>1</sup>**

The Greek sovereign debt crisis is severely impacting the Greek economy and adversely affecting the Group's operations, which have been adjusted accordingly in order to be aligned to the prevailing conditions. As at 30 June 2011 total assets amounted to €81.9bn (Dec. 2010: €83.9bn).

During the 12 months to June 2011, the loan book continued shifting towards lower risk categories, with loans excluding consumer lending remaining flat at €45.2bn whereas consumer lending was down by €1bn to €7.5bn. Gross loans reached €52.7bn, down 1.6%. In the same period, deposits receded to €34.9bn as a result of persisting recessionary conditions, public uncertainty and the Public Sector's to cash needs in Greece, which were not offset by the increase of deposits in New Europe.

<sup>1</sup> comparable figures have been adjusted to exclude Polish operations

As a result, the loan-to-deposit (L/D) ratio for the Group at the end of June stood at 144%, up from 127% one year ago. In New Europe, over the last 12 months, deposits increased by €0.7bn, whereas loans remained stable; hence the New Europe L/D ratio improved significantly from 134% to 121%.

Due to the Greek sovereign debt crisis, Greek banks could not access the markets for unsecured or secured funding. As a result, all Greek banks obtained funding through the European Central Bank's (ECB) normal market operations. At 30 June, Eurobank EFG's net balance with the ECB totalled €22.7bn (2010: €20.3bn).

In the first half of 2011 the Group recognised gains of €230m from the disposal of its Polish operations. Further to that and in view of the current unfavourable and uncertain macroeconomic conditions, the Group, for prudence purposes, formed a €130m collective reserve for securities and derivative exposures (not related with Greek sovereign risk) on an aggregate basis. Excluding the above one off item, the six months' Pre-provision income (PPI) reached €659m, from €770m in the 1st half 2010. Net interest income for the six months amounted to €1,019m, down 5.3%, as the increased cost of funding and the shift towards lower risk assets, were only partly mitigated by asset re-pricing. Net interest margin stood at 2.54% (1<sup>st</sup> half 2010: 2.69%). Fees and commissions, affected by weakened economic and credit activity in Greece, receded by 22% to €180m, and non core revenues<sup>2</sup> reduced by €30m to €65m. To counter the impact on revenues, intensive cost containment efforts continued for a third consecutive year. Operating expenses were 4.3% lower year-on-year, with the cost to income ratio<sup>2</sup>, at 47.8% (1<sup>st</sup> half 2010: 45.1%).

The containment of the impact of the Greek crisis on PPI enabled the full absorption of the loan provisions of €655m or 2.59% of average net loans (1st half 2010: € 628m, 2.44%). Non performing loans now stand at 10.1% of gross loans (end 2010: 8.2%). In New Europe, the improving macroeconomic conditions and the strengthening of the collection mechanisms resulted in lower bad debt provisions in the region by 17% on a year-on-year basis to €119m.

Overall, despite the adverse market environment and unprecedented conditions, the Group, maintained pre-provision income at levels sufficient to cover the negative consequences of recession, swiftly adjusting to the new requirements and supported by proven cost containment competencies and the improving environment and profitability in New Europe. Net profit attributable to shareholders amounted to €76m before the PSI impact (1<sup>st</sup> half 2010: €95m before the special tax contribution) while New Europe achieved €34m profits (1st half 2010 €30m).

### **Ordinary Share Capital**

As at 30 June 2011, following the merger with DIAS Closed End Investment Fund S.A., the ordinary share capital amounts to €1,553,785,080 divided into 552,948,427 ordinary voting shares of a nominal value of €2.81 each. All ordinary shares are registered, listed on the Athens Stocks Exchange and incorporate all the rights and obligations set by the Greek law (note 15 to the accounts).

<sup>2</sup> Excluding the Polish transaction and the collective reserve

The Repeat Annual General Meeting of 11<sup>th</sup> July 2011 approved the decrease of the Bank's share capital by the total amount of €326 million, by reducing the nominal value of the ordinary shares from €2.81 to €2.22, in order to offset transformation losses from previous years' mergers and losses carried forward. Following the decrease, the share capital will amount to €1,227,545,508 divided into 552,948,427 ordinary voting shares of a nominal value of €2.22 each. The decrease of the Bank's share capital will be formally completed with the appropriate registration by the Ministry of Development, Competitiveness and Shipping in the Companies' Registry.

### **Preference Share Capital**

As at 30 June 2011, the preference share capital amounts to €950,125,000 divided into 345,500,000 non-voting, non-listed, non-transferable, 10% preference shares, with nominal value €2.75 each, issued under Law 3723/2008 on 'Greek Economy Liquidity Support Program', and subscribed to by the Hellenic Republic. This entitles the Government to appoint its representative to the Board of Directors, veto strategic decisions and decisions which alter substantially the legal or financial position of the Bank and require the General Assembly's approval, veto dividend distributions and restrict management remuneration (note 16 to the accounts).

### **Capital Adequacy**

Including the impact of the impairment of Greek Government bonds, as detailed above, regulatory capital totalled €4.8bn at June 2011, with Tier I capital at €4.6bn (end 2010: €5.6bn and €5.1bn respectively), whereas the Group's risk weighted assets totalled €44.8bn (end 2010: €47.8bn). Consequently, the Capital Adequacy Ratio of the Group equalled 10.7% and the Tier I Ratio 10.2% (end 2010: 11.7%, and 10.6% respectively). Before the impact of the impairment, the ratios stood at 12.1% and 11.6% respectively, and the Core Tier 1 ratio at 10.1%. In addition to the capital enhancing actions of the strategic partnership in Poland and the merger with DIAS, the Bank has already decided on initiatives such as the disposal of a majority stake in its subsidiary in Turkey, various liability management and balance sheet optimisation actions and derisking, which will shortly further strengthen significantly the Group's capital base.

### **Business Outlook and Risks**

In order to address the substantial issues of Greece's public finances and the structural problems of the Greek economy, in May 2010 the Greek Government entered into an agreement with the European Commission (EC), the European Central Bank (ECB) and the International Monetary Fund (IMF) (collectively the official sector) for a three-year €110bn refinancing and restructuring programme. The programme addressed Greece's funding needs until mid-2012 and assumed that Greece will return to the markets after that date.

Following more recent developments, and in the context of an unfavourable global economic environment, Greece will not be able to access the markets by mid- 2012. A new funding programme was agreed with the European Commission, the ECB and the Eurozone member-states in the extraordinary European Council of July 21 2011. The total official financing of the new programme stands at €109bn. In addition, the programme includes a) extension of the European Financial

Stability Fund (EFSF) loans maturity to a minimum of 15 years from 7.5 years today (and a maximum of 30 years with a grace period of 10 years), b) EFSF lending rate of 3.5%, c) extension of the maturities of the initial €110bn EU/IMF loan, d) a debt buyback scheme and e) private sector involvement (PSI) via a menu of options decided in common with the Institute of International Finance (IIF) as a representative of the private sector. The July 21 Summit also decided to support the growth potential of the Greek economy with a development plan that is currently under discussion. Earlier this year, in June 2011, Greece committed to the implementation of the Medium Term Fiscal Strategy (MTFS), the acceleration of structural reforms and the completion by 2015 of a €50bn privatization and real estate development programme. The MTFS contains the necessary fiscal adjustments that will permit Greece to remain on a fiscal consolidation path (i.e. reduce the general government deficit from 7.5% of GDP in 2011 to 1.1% of GDP in 2015). The MTFS consists of a detailed plan of measures amounting to €28.3bn or 12% of GDP for the period 2011-15.

According to the 4<sup>th</sup> Review of the EC/ECB/IMF programme released in July 2011, Greek GDP is expected to contract by 3.9% on an annual basis with positive expectations postponed for 2012. On the other hand the continued rationalization, restructuring and austerity measures are planned to reduce the budget deficits in 2011 to 7.5% of GDP from 10.4% of GDP in 2010 with most initiatives already included in the MTFS. In this context, credit demand in 2011 is expected to be weaker than 2010 with the bank credit to domestic private sector contracting by 2.6% year-on-year in June 2011. The Greek banking system from 2009 onwards, due to the lack of access to the markets, relied on the ECB for its funding, which currently provides approximately €100bn (June 2011).

With regard to Central and South-eastern European countries, following a very strong start in the first quarter of this year, growth was somewhat softer in the second quarter. Overall, New Europe economies are expected to extend their output gains in the second half of 2011, a trend that will most likely continue in 2012, Turkey still exhibits robust domestic demand dynamics. Ukraine continues on a sharp recovery from the deep recession of 2009. Bulgaria and Romania lagged behind in 2010 but are catching up this year. Cyprus is confronted with significant fiscal policy challenges which are amplified by the recent tragic naval base incident. Overall, the outlook for New Europe remains positive, and the Group expects profitability to accelerate.

As noted the main risks for the next 12 months stem from the macroeconomic environment and the developments on the eurozone debt crisis and the success, or otherwise, of the significant fiscal adjustments in Greece and their impact on the economy. To date satisfactory results have been registered, but progress could be compromised by external shocks from the global economy as well as implementation risks and reform fatigue in Greece. In addition, the restoration of confidence, the attraction of new investments and the revival of economic growth remain key challenges that may be viewed as opportunities if successfully tackled.

Continuation of the recession could adversely affect the region and could lead to lower profitability and deterioration of asset quality. In addition, increased funding cost remains a significant risk, as it is dependent on the level of sovereign spreads, as well as foreign exchange rate risk, due to the unstable nature of some currencies. Finally, the Group holds positions in the bond, stock and foreign

exchange markets and consequently is exposed to the risk of losses if market valuations decrease.

In this environment, Eurobank EFG's operations i.e. excluding the one-off impairment charge on Greek Government bonds remain profitable, adjusting continuously to the new requirements. The shift towards collateralised lending, self funded growth and the more promising markets has been in place for some time. In addition, the Group continues to reduce its cost base in order to increase the efficiency of operations. It also strengthens collection efforts to maximize loan recoveries by redeploying resources where necessary and implements conservative provisioning policies. Finally, the Group improves continuously the effectiveness of balance sheet management and reinforces its capital and liquidity, undertaking significant strategic initiatives in this direction.

The Group continues to support the recovery of the Greek economy and stands by its clients deepening relationships with them, enhances the engagement of its staff and strengthens the value of its franchise.

***III. Auditor's Report on Review of Interim Financial Information***

## **Report on Review of Interim Financial Information**

### **To the Shareholders of EFG EUROBANK ERGASIAS S.A.**

#### ***Introduction***

We have reviewed the accompanying condensed company and consolidated balance sheet of EFG EUROBANK ERGASIAS S.A. (the “Bank”) and its subsidiaries as of 30 June 2011 and the related condensed company and consolidated statements of income, comprehensive income, changes in equity and cash flows for the six-month period then ended and the selected explanatory notes, that comprise the interim condensed financial information and which form an integral part of the six-month financial report as required by article 5 of L.3556/2007. Management is responsible for the preparation and presentation of this condensed interim financial information in accordance with International Financial Reporting Standards as they have been adopted by the European Union and applied to interim financial reporting (International Accounting Standard “IAS 34”). Our responsibility is to express a conclusion on this interim condensed financial information based on our review.

#### ***Scope of review***

We conducted our review in accordance with International Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### ***Conclusion***

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with IAS 34.

#### ***Reference to Other Legal and Regulatory Requirements***

Our review has not revealed any inconsistency or discrepancy of the other information included in the six-month financial report, as required by article 5 of L.3556/2007, with the accompanying interim condensed financial information.

**1. General information**

EFG Eurobank Ergasias S.A. (the "Bank") and its subsidiaries (the "Group") are active in retail, corporate and private banking, asset management, insurance, treasury, capital markets and other services. The Bank is incorporated in Greece and its shares are listed on the Athens Stock Exchange. The Group operates mainly in Greece and in Central, Eastern and Southeastern Europe (New Europe).

These condensed consolidated interim financial statements were approved by the Board of Directors on 29 August 2011.

**2. Basis of preparation of condensed consolidated interim financial statements**

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard (IAS) 34 "Interim Financial Reporting" and they should be read in conjunction with the Group's published consolidated annual financial statements for the year ended 31 December 2010. Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current period. Except as indicated, financial information presented in euro has been rounded to the nearest million.

**3. Principal accounting policies**

The accounting policies and methods of computation in these condensed consolidated interim financial statements are consistent with those in the published consolidated annual financial statements for the year ended 31 December 2010.

The following amendments to standards and interpretations are effective from 1 January 2011, but currently, they do not have a significant effect to the Group's financial statements:

- IAS 24, Amendment - Related Party Disclosures
- IAS 32, Amendment - Classification of Rights Issues
- IFRIC 14, Amendment - Prepayments of a Minimum Funding Requirement
- IFRIC 19, Extinguishing Financial Liabilities
- Amendments to various Standards that form part of IASB's 2010 Annual Improvement Project.

**4. Critical accounting estimates and judgements in applying accounting policies**

In preparing these condensed consolidated interim financial statements, the significant judgements made by Management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those applied to the published consolidated annual financial statements for the year ended 31 December 2010 with the exception of impairment of Greek sovereign debt (note 10).

**5. Segment information**

Management has determined the operating segments based on the internal reports reviewed by the Strategic Planning Group (SPG) that are used to allocate resources and to assess its performance in order to make strategic decisions. The SPG considers the business both from a business unit and geographic perspective. Geographically, management considers the performance of its business in Greece and other countries in Europe (New Europe). Greece is further segregated into retail, wholesale, wealth management, and global and capital markets while New Europe is monitored and reviewed on a country basis. The Group aggregates segments when they exhibit similar economic characteristics and profile and are expected to have similar long-term economic development.

With the exception of Greece no other individual country contributed more than 10% of consolidated income. The Group is organized in the following reportable segments:

- Retail: incorporating customer current accounts, savings, deposits and investment savings products, credit and debit cards, consumer loans, small business banking and mortgages.
- Corporate: incorporating direct debit facilities, current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products to corporate entities.
- Wealth Management: incorporating private banking services, including total wealth management, to medium and high net worth individuals, insurance, mutual fund and investment savings products, and institutional asset management.
- Global and Capital Markets: incorporating investment banking services including corporate finance, merger and acquisitions advice, custody, equity brokerage, financial instruments trading and institutional finance to corporate and institutional entities, as well as, specialised financial advice and intermediation to private and large retail individuals as well as small and large corporate entities.
- New Europe - incorporating operations in Romania, Bulgaria, Serbia, Cyprus, the Ukraine and Turkey.

Other operations of the Group comprise mainly of investing activities, including property management and investment and the management of unallocated capital.

The Group's management reporting is based on International Financial Reporting Standards (IFRS). The accounting policies of the Group's operating segments are the same with those described in the principal accounting policies.

Revenues from transactions between business segments are allocated on a mutually agreed basis at rates that approximate market prices.

## 6. Earnings per share

Basic earnings per share is calculated by dividing the net profit attributable to ordinary shareholders by the weighted average number of ordinary shares in issue during the period, excluding the average number of ordinary shares purchased by the Group and held as treasury shares.

The diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all potentially dilutive ordinary shares. The Group has two categories of potentially dilutive ordinary shares: share options and convertible, subject to certain conditions, preferred securities. In order to adjust the weighted average number of shares for the share options a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market price of the Bank's shares for the period) based on the monetary value of the subscription rights attached to outstanding share options. The number of shares calculated as above is added to the weighted average number of ordinary shares in issue in order to determine the weighted average number of ordinary shares used for the calculation of the diluted earnings per share.

- Basic and diluted earnings/(losses) per share excluding impairment losses on Greek sovereign debt and special tax contribution	€	(0.28)	0.07	(0.04)	0.02

Basic and diluted earnings per share from discontinued operations for the period ended 30 June 2011 amount to € 0.34 (2010: loss per share € 0.03).

Share options did not have an effect on the diluted earnings per share, as their exercise price exceeded the average market price of the Bank's shares for the period. The Series D and Series E of preferred securities (note 17), issued in July and November 2009 respectively, were not included in the calculation of diluted earnings per share, as their effect would have been anti-dilutive. The scheme of contingently (performance based) issuable shares has been terminated within 2011.

## 7. Income tax

According to Law 3943/2011, the nominal Greek corporate tax rate as of January 2011 reduced from 24% to 20% (2010: 24%). In addition, dividends distributed as of 2012 are subject to a 25% withholding tax (21% withholding tax for dividends distributed within 2011).

Income tax expense for the period ended 30 June 2010 includes the amount of € 45 million, being a special tax contribution imposed by Law 3845/2010 on legal entities' net revenues of year 2009.

## 8. Discontinued operations

Based on the terms of the Investment Agreement signed with Raiffeisen Bank International AG (RBI) in February 2011, the Group has recorded the disposal of its Polish operations as of 31 March 2011 for a total consideration of € 718 million. The consideration receivable will be subject to adjustments based on the Net Assets' Value of Polbank EFG at the closing of the transaction and includes the minimum value of the Group's put option on its 13% stake in the combined-with-RBI Polish operations. The put option will continue to be valued in the Group's Income Statement based on the business performance of the combined entity. The results of the Group's Polish operations presented as a discontinued operation are set out below. The income statement distinguishes discontinued operations from continuing operations. Comparative figures have been restated.

## 10. Credit risk exposure on Greek government bonds

At the European summit held on 21 July 2011, Heads of States from the 17 euro zone member states agreed an integrated assistance plan for Greece, including a voluntary debt exchange programme for the Private Sector (Private Sector Involvement - PSI). Under PSI, Greek government bondholders will have the opportunity to voluntarily exchange existing Greek government bonds (GGBs) with maturities between mid-2011 and end-2020, for new bonds to be issued by Greece of longer maturities up to 30 years, with their principal collateralized by AAA-rated bonds, together with a debt buy back plan developed for the Greek government. The voluntary debt exchange programme, which aims to attract 90% of all eligible bonds, will be carried out under the terms and conditions released, at the same date, by the International Institute of Finance (IIF). The new bonds are expected to be ECB eligible.

The Group envisages significant participation in this exchange programme and currently examines the alternative options available.

The 21 July 2011 initiative provided evidence of a concession granted to the borrower (the Greek State) by the lender relating to the borrower's financial difficulty that the lender would not otherwise consider. Accordingly, on the assumption of a 100% participation from the Group and on the expectation that the PSI will be successfully completed, an impairment loss was recognised in profit and loss during the 1st half 2011 amounting to € 830 million on GGBs which are eligible for exchange (face value: € 4,982 million). The impairment loss on Debt securities lending € 759 million and Held-to-maturity € 61 million has been calculated based on the existing exchange options of the IIF initiative by discounting expected future cash flows at the securities' effective interest rate and includes losses of € 217 million before tax previously recognised in other comprehensive income for reclassified securities from Available-for-sale portfolio. Estimations of future cash flows resulting from the exchanged bonds have been carried out based on prevailing Group's assessment of available options and on mid-August 30-year swap rates and are subject to the finalisation and execution of the programme. The impairment loss on the Available-for-sale € 10 million is based on the 30 June 2011 market values.

As of 30 June 2011, the carrying value after impairment of these Greek government securities amounted to € 4,356 million (Debt securities lending € 3,538 million, Held-to-maturity € 806 million and Available-for-sale € 12 million).

**10. Credit risk exposure on Greek government bonds (continued)**

Considering that the European support plan improves the terms and conditions of financial assistance to Greece and enhances the sustainability of Greece's debt profile, the Group assesses that Greece will be able to meet its commitments for the future and there is no objective evidence to date that recovery of the future cash flows associated with the securities not included in the programme (not eligible for the exchange plan) is compromised. Therefore, no impairment has been recognised on these securities (GGBs and Treasury bills) with carrying value € 5,483 million (Debt securities lending € 5,402 million and Available-for-sale € 81 million).

The Group's exposure to GGBs and Treasury bills, after impairment, broken down by residual term is as follows:

	Years 2011-2020 €million	Years over 2020 €million	Total €million
Eligible GGBs	4,356	-	4,356
Non eligible GGBs (incl. T-bills)	3,219	2,264	5,483
<b>Total</b>	<b>7,575</b>	<b>2,264</b>	<b>9,839</b>

**11. Investment securities**

	30 June 2011 €million	31 December 2010 €million
Available-for-sale investment securities	2,920	3,369
Debt securities lending portfolio	10,054	9,765
Held-to-maturity investment securities	2,819	3,429
	<b>15,793</b>	<b>16,563</b>

In accordance with the amendments to IAS 39, the Group reclassified eligible debt securities from the "Available-for-sale" portfolio to "Debt securities lending" portfolio carried at amortised cost. Interest on the reclassified securities continued to be recognised in interest income using the effective interest rate method. If the financial assets had not been reclassified, changes in the fair value for the period from the reclassification date until 30 June 2011 would have resulted in € 686 million losses net of tax, which would have been recognised in the available-for-sale revaluation reserve.

As of 2011, the fair value of the reclassified Greek Government Bonds has been estimated using a valuation technique. In accordance with the Group's policy, valuation models are used where the market for specific financial instruments is highly illiquid. This may be evidenced by various market indicators such as low frequency of trades, significantly low trading volumes, and exchanges that do not represent orderly market transactions. Following the 21 July European Summit decisions about Greek Sovereign debt (note 10), the Group has calibrated its valuation model by maximizing the use of relevant observable inputs for fair valuing Greek Government Bonds, discounting cash flows at 9% to reflect a 21% discount, which was the rate applied by the International Institute of Finance (IIF).

	€ million	€ million
345,500,000	950	950
<b>345,500,000</b>	<b>950</b>	<b>950</b>

On 12 January 2009 the Extraordinary General Meeting of the Bank approved the issue of 345,500,000 non-voting, non-listed, non-transferable, tax deductible, non-cumulative 10% preference shares, with nominal value € 2.75 each, under Law 3723/2008 "Greek Economy Liquidity Support Program", to be fully subscribed to and paid by the Greek State with bonds of equivalent value. The proceeds of the issue total € 940 million, net of expenses, and the transaction was completed on 21 May 2009. In accordance with the current legal and regulatory framework, the issued shares have been classified as Tier 1 capital.

The preference shares pay a non-cumulative coupon of 10%, subject to meeting minimum capital adequacy requirements, set by Bank of Greece, availability of distributable reserves in accordance with article 44a of Company Law and the approval of the Annual General Meeting. According to article 39 of Law 3844/2010, five years after the issue of the preference shares or earlier subject to the approval of the Bank of Greece, the Bank may redeem the preference shares at their nominal value. In case of non redemption at the expiration of the five year period, the coupon is increased by 2% each year.

In June 2011, the Annual General Meeting approved the distribution of dividend amounting to € 95 million attributable to preference shares for 2010.

As at 30 June 2011, the dividend attributable to preference shares amounted to € 142 million, out of which € 47 million refer to the period ended 30 June 2011 (30 June 2010: € 106 million and € 47 million respectively).

The Group's capital commitments in terms of property, plant and equipment amounted to € 6 million (31 December 2010: € 9 million).

## 19. Post balance sheet events

The Board of Directors of Alpha Bank and Eurobank EFG jointly announced on 29 August 2011, that they have agreed to recommend to General Meetings of their shareholders, the merger of the two banks. The combined group will proceed with the implementation of a comprehensive capital strengthening plan, equivalent to € 3.9 billion, targeting significantly enhanced capital buffers.

The suggested share exchange ratio is 5 new Alpha Bank ordinary shares for every 7 Eurobank EFG ordinary shares. The merger is expected to be approved by the Extraordinary General Meetings of the two banks in November 2011, with completion of the legal merger effected by mid-December 2011.

Details of significant post balance sheet events are also provided in the following note:

Note 15-Ordinary share capital, share premium and treasury shares

## 20. Greek Economy Liquidity Support Program

The Bank participates in the Greek Government's plan to support liquidity in the Greek economy under Law 3723/2008, as extended by Laws 3844/2010, 3845/2010 and 3872/2010, as follows:

- First stream - preference shares  
345,500,000 non-voting preference shares with nominal value of € 950 million were subscribed to by the Hellenic Republic on 21 May 2009 (note 16).
- Second stream - bonds guaranteed by the Hellenic Republic  
During the period, the Bank issued an additional amount of bonds of € 1,882 million. As at 30 June 2011, the government guaranteed bonds totalling to € 13,932 million were fully retained by the Bank (note 14).
- Third stream - lending of Greek Government bonds  
Liquidity obtained under this stream must be used to fund mortgages and loans to small and medium-size enterprises. As at 30 June 2011, the Bank had borrowed special Greek Government bonds of € 1,737 million.

According to Law 3965/2011, the total amount of bonds guaranteed by the Hellenic Republic that Greek banks may issue was increased by € 30 bn. In this respect, banks have to devise and implement medium-term funding plans, which will be confirmed by the Bank of Greece. The plans should be approved by the Bank of Greece and ECB in cooperation with the EC and IMF.

According to Law 3723/2008, as extended by the Law 3965/2011, for the period the Bank participates in the program through the preference shares or the guaranteed bonds (streams (a) and (b) above), the Government is entitled to appoint its representative to the Board of Directors, veto strategic decisions, decisions which alter substantially the legal or financial position of the Bank and require the General Assembly's approval and dividend distributions as well as restrict management remuneration.

In addition, according to Law 3756/2009, as extended by Law 3844/2010 and Law 3965/2011, banks participating in the Greek Economy Liquidity Support Program are not allowed to declare a cash dividend to their ordinary shareholders for 2008, 2009 and 2010 and are not allowed to acquire treasury shares under article 16 of the Company Law.

**21. Related party transactions**

The Bank is a member of the worldwide EFG Group, which consists of credit institutions, financial services and financial holding companies. The operating parent company of the EFG Group is European Financial Group EFG (Luxembourg) S.A., whilst its ultimate parent company is Private Financial Holdings Limited (PFH), which is owned and controlled indirectly by members of the Latsis family. As at 30 June 2011, the EFG Group held 43.7% of the ordinary shares and voting rights of the Bank through wholly owned subsidiaries of the ultimate parent company, the remaining ordinary shares and voting rights being held by institutional and retail investors, none of which, to the knowledge of the Bank, holds 5% or more.

The Bank's annual consolidated financial statements are fully consolidated in the annual consolidated financial statements of European Financial Group EFG (Luxembourg) S.A., which does not prepare interim financial statements.

A number of banking transactions are entered into with related parties in the normal course of business and are conducted on an arm's length basis. These include loans, deposits and guarantees. In addition, as part of its normal course of business in investment banking activities, the Group at times may hold positions in debt and equity instruments of related parties. The volume of related party transactions and outstanding balances at the period/year-end are as follows:
