Consolidated Pillar 3 Report

Introduction – General Information

1. Introduction - General Information

Eurobank Ergasias Services and Holdings S.A. (the Company or Eurobank Holdings) is the parent company of Eurobank S.A. (the Bank), which resulted from the demerger of Eurobank Ergasias S.A. through its banking sector's hive down that was completed in March 2020. Further information is provided in note 44 "Corporate Transformation-Hive down" of the Consolidated Financial Statements for the year ended 31 December 2020.

Following the demerger, "Eurobank Ergasias Services and Holdings S.A." is supervised on a consolidated basis and "Eurobank S.A." is supervised on a standalone basis by the European Central Bank (ECB) and the Bank of Greece (BoG).

The Company and its subsidiaries (the Group), consisting mainly of Eurobank S.A. Group, are active in retail, corporate and private banking, asset management, treasury, capital markets and other services. The Group operates mainly in Greece and in Central and Southeastern Europe. The Company is incorporated in Greece and its shares are listed on the Athens Stock Exchange.

1.1 Operational targets for Non-Performing Exposures (NPEs)

As at 31 March 2021, the Group's NPEs' stock amounted to € 5.8 billion (31 December 2020: € 5.7 billion), driving the NPE ratio to 14.2% (31 December 2020: 14.0%), while the NPE coverage ratio stood at 61.9% (31 December 2020: 61.8%).

In line with the regulatory framework and SSM requirements for NPEs management, in March 2021 the Group submitted its NPE Management Strategy for 2021-2023, along with NPE stock annual targets at both Bank and Group level. The submitted plan has taken into account a new NPE securitization of ca. € 3.3 billion and envisages the decrease of NPE ratio at 8.8% at the end of 2021, 6.4% in 2022 and below 6% in 2023.

Eurobank has been taking all appropriate actions to address liquidity difficulties of businesses and individuals caused by the limited or suspended operations of businesses resulting from the impact of Covid-19. In this context, Eurobank has defined a set of emergency relief measures that will apply to specific segments that are affected by Covid-19. Since January 2021 when the vast majority of moratoria measures expired, the priority of the Bank is to take timely action to minimize any cliff effects, capitalizing on all available schemes and offering customised solutions that will gradually lead to pre Covid-19 payment patterns.

1.2 Tier 2 Capital instruments

In January 2018, Eurobank Ergasias S.A. issued Tier 2 capital instruments of face value of € 950 million, in replacement of the preference shares which had been issued in the context of the first stream of Hellenic Republic's plan to support liquidity in the Greek economy under Law 3723/2008. The aforementioned instruments, which have a maturity of ten years (until 17 January 2028) and pay fixed nominal interest rate of 6.41%, that shall be payable semi-annually, as at 31 March 2021, amounted to € 962 million, including € 15 million accrued interest and € 3 million unamortized issuance costs.

1.3 Regulatory framework

The general Basel III framework is structured around three mutually reinforcing pillars:

Pillar 1 defines the minimum regulatory capital requirements, based on principles, rules and methods specifying and
measuring credit, market and operational risk. These requirements are covered by regulatory own funds, according
to the rules and specifications of CRR.

Consolidated Pillar 3 Report

Introduction - General Information

- Pillar 2 addresses the internal processes for assessing overall capital adequacy in relation to risks (Internal Capital Adequacy Assessment Process - ICAAP and Internal Liquidity Assessment Process - ILAAP). Pillar 2 also introduces the Supervisory Review & Evaluation Process (SREP), which assesses the internal capital adequacy of credit institutions.
- Pillar 3 deals with market discipline by developing a set of quantitative and qualitative disclosure requirements, which allow market participants to assess key pieces of information on the scope of application, capital, risk exposures, risk assessment processes and hence the capital adequacy and the internal liquidity adequacy of credit institutions.

According to the CRD IV provisions (with gradual implementation until 2019):

- Minimum Common Equity Tier 1 (CET1) ratio: 4.5%;
- Minimum Tier 1 ratio: 6%;
- Minimum Total Capital ratio: 8%
- Furthermore, banks are required to maintain in addition to the Common Equity Tier 1 capital a capital conservation buffer equal to 2.5 % (from 1 January 2019) of their total risk exposure amount calculated.

As a result the minimum ratios which must be met, including the capital conservation buffer and which shall apply from 1 January 2019 are:

- Minimum CET1 capital ratio 7% and
- Total capital adequacy ratio 10.5%.

Additional capital buffers that CRD IV introduces are the following:

- a) Countercyclical buffer. The purpose of this buffer is to counteract the effects of the economic cycle on banks' lending activity, thus making the supply of credit less volatile and possibly even reduce the probability of credit bubbles or crunches. Credit institutions are required under the CRD IV to build up an additional buffer of 0 2.5% of CET1 during periods of excess credit growth, according to national circumstances. According to relevant BoG Executive Committee Act No 186, the countercyclical buffer was set at 0% for the second quarter of 2021.
- b) Global systemic institution buffer (G-SIIs). CRD IV includes a mandatory systemic risk buffer of CET1 for banks that are identified by the relevant authority as globally systemically important, which is not applicable to Greek banks.
- c) Other systemically important institutions buffer (O-SIIs). On 3.04.2020, European Banking Authority (EBA) published the updated list of O-SIIs in the EU. O-SIIs are those institutions, which are deemed systematically relevant in addition to G-SIIs, already identified. This list reflects also the additional capital buffers that the relevant authorities have set for the O-SIIs. The list of O-SIIs is disclosed on an annual basis, along with any CET1 capital buffer requirements, which may need to be set or reset. In case of higher capital requirements, these become applicable at least one year after the publication of the O-SIIs list, to give institutions enough time to adjust to the new buffer requirements.

The EBA methodology has been applied to compute the scores for all the institutions operating in Greece using consolidated data. Based on the above scoring system, all Greek O-SIIs are classified in bucket 4, which corresponds to a capital buffer up to 1% initially to be phased in until 2022. In order to provide further flexibility to credit institutions in reaction to the coronavirus and mitigate the subsequent financial impact, the initial phasing-in period has been adjusted until 2023. The date of activation was 1 January 2016 and BoG's Executive Committee Acts 163/1.11.2019 and 174/26.6.2020 set the O-SII buffer for Greek Institutions for the years 2020 and 2021 at 0.50% respectively.

Consolidated Pillar 3 Report

Introduction - General Information

Regulatory Developments

On 17 December 2020, the European Commission published Regulation 2021/451, which lays down uniform reporting formats and templates, instructions, frequency and dates of reporting. This Regulation shall apply from 28 June 2021 except from the reporting on leverage ratio buffer requirement for G-SIIs and own funds / own funds requirements for investment firms which shall apply from 1 January 2023 and 26 June 2026 respectively..

On 29 May 2020, the European Banking Authority (EBA) published its Guidelines on loan origination and monitoring that expect Banks to develop robust and prudent standards to ensure newly originated loans are assessed properly. The Guidelines set requirements for assessing the borrowers' creditworthiness together with the handling of information and data for the purposes of such assessments. In these requirements, the Guidelines bring together the EBA's prudential and consumer protection objectives. The application of the Guidelines for newly originated loans needs to be in place within Q2 2021, while gradually and until Q2 2024 the application of the Guidelines need to be expanded to existing loans that have been renegotiated and to the stock of existing loans.

On 27 November 2020 ECB published its final and amended guide on climate-related and environmental risks following up with banks in two concrete steps. In early 2021 it will ask banks to conduct a self-assessment in light of the supervisory expectations outlined in the guide and to draw up action plans on that basis. The ECB will then benchmark the banks' self-assessments and plans and challenge them in the supervisory dialogue. In 2022 it will conduct a full supervisory review of banks' practices and take concrete follow-up measures where needed and it will include in the next supervisory stress test the climate related risks.

On 22 December 2020, EBA published an update to the reporting framework 3.0 and the ITS on institutions' Pillar 3 public disclosures, the mapping of quantitative disclosure data and supervisory reporting and also a summary of the frequency of disclosure of each template and table, in accordance with the Regulation (EU) No 876/2019 (CRR2). The disclosure requirements are applicable from June 2021.

On 1 March 2021, EBA published a consultation paper on draft implementing technical standards (ITS) on Pillar 3 disclosures on Environmental, Social and Governance (ESG) risks. The draft ITS put forward comparable disclosures that show how climate change may exacerbate other risks within institutions' balance sheets, how institutions are mitigating those risks, and their green asset ratio on exposures financing taxonomy-aligned activities, such as those consistent with the Paris agreement goals. These disclosure requirements are applicable from June 2022 on an annual basis during the first year and biannually thereinafter.

COVID-19 regulatory measures

The COVID-19 pandemic constitutes an unprecedented challenge with very severe socio-economic consequences. Regulatory authorities have responded to this challenge with a number of regulatory measures.

On 12 March 2020, the ECB announced a number of measures to ensure that its directly supervised banks can continue to fulfil their role in funding the real economy. Specifically, banks will be allowed, among others, to operate temporarily below the level of capital defined by the Pillar 2 Guidance and the Combined Buffer Requirement. Banks will also be allowed to partially use capital instruments that do not qualify as CET1 capital, for example Additional Tier 1 (AT1) or Tier 2 instruments, to meet the Pillar 2 Requirements (P2R).

On 20 March 2020 the ECB published FAQs on supervisory measures in reaction to the coronavirus. The relief measures cover the following: a) asset quality deterioration and non performing loans, b) operational aspects of supervision and c) capital and liquidity requirements.

Consolidated Pillar 3 Report

Introduction - General Information

Following the ECB recommendation of 27 March of 2020 (2020/19) on dividend distribution, the ECB recommends that at least until 1 October 2020 no dividends are paid out and no irrevocable commitment to pay out dividends is undertaken by the credit institutions for the financial year 2019 and 2020 and that credit institutions refrain from share buy-backs aimed at remunerating shareholders. On 15 December 2020, ECB extended its recommendation to banks on dividend distributions and share buy-backs until 30 September 2021 and asked banks to be extremely moderate with regard to variable remuneration.

On 2 April 2020, the European Banking Authority (EBA) published "Guidelines on legislative and non-legislative moratoria on loan repayments applied in the light of the COVID-19 crisis before 30 June 2020". On 25 June 2020, EBA introduced a new deadline of 30 September 2020 replacing the previous date of 30 June 2020. The aim of these Guidelines was to clarify the requirements for public and private moratoria, which if fulfilled, will help avoid the classification of exposures under the definition of forbearance or as defaulted under distressed restructuring.

On 2 December 2020, EBA has decided to reactivate its Guidelines on Legislative and non-legislative moratoria due to the exceptional circumstances of the second COVID-19 wave. This reactivation will ensure that loans, which had previously not benefitted from payment moratoria, can now also benefit from them. The role of banks to ensure the continued flow of lending to clients remains of utmost importance. These Guidelines, which will apply until 31 March 2021, include additional safeguards against the risk of an undue increase in unrecognised losses on banks' balance sheet.

On 28 April 2020, the European Commission has proposed targeted "quick fix" amendments to Regulation (EU) No 575/2013 (Capital Requirements Regulation) and Regulation (EU) 2019/876 (CRR2) in order to mitigate the economic impact of the 2019 coronavirus disease (COVID-19) pandemic.

The changes include exceptional temporary measures to alleviate the immediate impact of Coronavirus-related developments, by adapting the timeline of the application of international accounting standards on banks' capital, by treating more favourably public guarantees granted during this crisis, by postponing the date of application of the leverage ratio buffer and by modifying the way of excluding certain exposures from the calculation of the leverage ratio.

The Commission also proposed to advance the date of application: a) of several agreed measures that incentivise banks to finance employees, SMEs and infrastructure projects and b) of the exemption of certain software assets from capital deductions. The Commission called for the Council and the Parliament to adopt the amending Regulation before the end of June 2020.

On 9 June 2020, the Economic and Monetary Affairs Committee MEPs agreed to apply specific changes to the capital requirements regulation (CRR), which will have to be coherently applied in the EU. Banks will have to monitor the effects of the pandemic on their balance sheets, pay close attention to non-performing loans and apply know-your-customer standards. The material changes include:

- Extension by two years of the transitional arrangements for IFRS 9 (international accounting standard) and further relief measures (capital add back);
- Alignment of minimum coverage requirements for non-performing loans guaranteed by the public sector with those guaranteed by official export credit agencies;
- Deferred application of the leverage ratio buffer by one year to January 2023;
- Advanced application of a more favourable prudential treatment of loans to pensioners or employees with a permanent contract that are backed by the borrower's pension or salary;
- Advanced application of both, the SME and infrastructure supporting factors, which allows for a more favourable
 prudential treatment of certain exposures to SMEs and infrastructure;

Consolidated Pillar 3 Report

Introduction - General Information

- Temporary treatment of unrealised gains and losses measured at fair value through other comprehensive income in relation to exposures to central of governments, to regional governments, to local authorities and public sector entities;
- Banks will no longer be required to fully deduct software assets from their capital.

The plenary session vote on the CRR 'quick fix' took place on 19 June 2020.

On June 24, 2020, the EU Council announced that it had adopted Regulation (EU) 2020/873 (CRR 'quick fix') amending Regulations (EU) No 575/2013, as amended ("CRR") and (EU) 2019/876 ("CRR2").

The CRR 'quick fix' legislation intends to help credit institutions to mitigate impact of the COVID-19 outbreak and to provide incentives for banks to continue lending to business and consumers.

On 2 June 2020, EBA published GL/2020/11 guidelines to clarify how to report the CRR 'quick fix' amendments that have an impact on templates related to the leverage ratio, own funds and credit risk. The reporting requirements clarified by these guidelines will apply from the date of publication until the reporting reference date of 31 May 2021. The disclosure requirements clarified by these guidelines will apply from the date of publication until and including the last disclosure reference date prior to the disclosure reference date of 28 June 2021.

On 17 September 2020 the European Central Bank (ECB) announced that euro area banks under its direct supervision may exclude certain central bank exposures from the leverage ratio. The move is aimed at easing the implementation of monetary policy. Banks may benefit from this measure until 27 June 2021.

On 14 October 2020, the European Banking Authority (EBA) published its final draft regulatory technical standards (RTS) specifying the prudential treatment of software assets according to Art. 36(4) of the Capital Requirements Regulation (CRR), based on a prudential amortisation of software assets. EBA has concluded that the prudential amortization approach would best fit its purpose and objectives. This method implies that the positive difference between prudential and accounting accumulated depreciation shall be fully deducted from CET1, while the residual portion of the carrying amount shall be risk-weighted. If the useful life of software estimated for accounting purposes is shorter than the prudential amortization period, the former shall be used also for prudential purposes. Additionally, the prudential amortization period has been set at maximum 3 years, starting from the date on which the software asset is available for use. The prudential amortizations and deductions shall be made separately for each software asset. All the investments made for maintaining, enhancing or upgrading the existing software assets shall be treated as separate assets, considering that those investments are recognized as an intangible asset on the balance sheet. In line with the recent CRR 'quick fix', the date of entry into force of the RTS has been moved forward to the day following its publication in the Official Journal of the EU, i.e. 23 December 2020.

On 6 April 2021, the EU adopted earlier two regulations to amend the securitisation framework (the review planned for 2022). The Regulation (EU) 2021/557 amending the Securitisation Regulation (2017/2402) provides a general framework for securitisation and creates a specific framework for simple, transparent and standardised (STS) securitisations. The Regulation (EU) 2021/558 makes changes to the CRR with respect to certain adjustments to securitisation framework. Both regulations come into force on 9 April 2021.

Furthermore the Basel Committee's oversight body, the Group of Central Bank Governors and Heads of Supervision (GHOS), has endorsed a set of measures to provide additional operational capacity for banks and supervisors to respond to the immediate financial stability priorities resulting from the impact of the coronavirus disease (COVID-19) on the global banking system:

Consolidated Pillar 3 Report

Introduction - General Information

- The implementation date of the Basel III standards finalised in December 2017 has been deferred by one year to 1
 January 2023. The accompanying transitional arrangements for the output floor has also been extended by one year
 to 1 January 2028;
- The implementation date of the revised market risk framework finalised in January 2019 has been deferred by one year to 1 January 2023;
- The implementation date of the revised Pillar 3 disclosure requirements finalised in December 2018 has been deferred by one year to 1 January 2023.

Stress Tests

In January 2021, the EBA launched the 2021 EU-wide stress test exercise which will provide valuable input for assessing the resilience of the European banking sector, notably its ability to absorb shocks under adverse macroeconomic conditions.

This exercise is coordinated by the EBA in cooperation with the ECB and national authorities, and is conducted according to the EBA's methodology, which was published in November 2020. It is carried out on the basis of year-end 2020 figures and assesses the resilience of EU banks under a common macroeconomic baseline scenario and a common adverse scenario, covering the period of 2021-2023. The baseline scenario for EU countries is based on the projections from the national central banks of December 2020, while the adverse scenario assumes the materialisation of the main financial stability risks that have been identified by the European Systemic Risk Board (ESRB) and which the EU banking sector is exposed to. The adverse scenario also reflects ongoing concerns about the possible evolution of the Covid-19 pandemic coupled with a potential strong drop in confidence and is designed to ensure an adequate level of severity across all EU countries.

In parallel, the ECB also conducts its own stress test for the banks it directly supervises but that are not included in the EBA-led stress test sample. This exercise is consistent with the EBA's methodology and apply the same scenarios, while also including proportionality elements as suggested by the overall smaller size and lower complexity of these banks. Eurobank Holdings Group participates in the ECB-led stress test.

The results of both stress tests will be used to assess each bank's Pillar 2 capital recommendation ("Guidance") in the context of the Supervisory Review and Evaluation Process (SREP). The stress test process is currently in progress and the results for the EBA stress test are expected to be published by the end of July 2021.

Consolidated Pillar 3 Report

Introduction - General Information

1.4 Scope of Pillar 3

The purpose of Pillar 3 report is to provide updated information the Group's risk management practices, risk assessment processes and regulatory capital adequacy ratios.

Pillar 3 disclosures consist of both qualitative and quantitative information and are provided on a consolidated basis. They have been prepared in accordance with Part 8 of the Capital Requirements Regulation within CRD IV (Regulation 2013/575/EU) and according to the regulatory consolidation framework, which is described in the following section.

In December 2016 EBA published EBA/GL/2016/11 guidelines on revised Pillar 3 disclosures requirements to improve the consistency and comparability of institutions' regulatory disclosures. These guidelines harmonised the frequency of disclosures and updated the list of requirements to be considered for more frequent disclosures.

According to the above guidelines, for templates that require the disclosure for current and previous reporting periods, the previous reporting period is always referred to as the last data disclosed according to the frequency of the template. When the disclosure is being reported for the first time, the data of the previous period is not required.

In December 2018 EBA published EBA/GL/2018/10 guidelines, which include enhanced disclosure formats for credit institutions for disclosures related to non-performing exposures, forborne exposures and foreclosed assets. Some templates are applicable to significant credit institutions that have a gross NPL ratio of 5% or above, as is the case for the Group.

In June 2019 the European Parliament (EP) and the Council published the Regulation (EU) No 876/2019 or CRR2 amending the CRR, regarding among others the reporting and disclosure framework. The CRR 2 rules follow a phased implementation with significant elements entering into force in 2021.

In response to the COVID-19 pandemic, EBA published EBA/GL/2020/07 guidelines, which introduce additional requirements in relation to the disclosure on exposures subject to the EBA Guidelines on legislative and non-legislative moratoria on loan repayments applied in the light of the COVID-19 crisis and on newly originated exposures subject to public guarantee schemes. The disclosure requirements apply semi-annually.

In addition to the CRR 'quick fix', EBA issued EBA/GL/2020/12 guidelines, which amend the EBA/GL/2018/01 on uniform disclosures under Article 473a of Regulation (EU) No 575/2013 (CRR) as regards the transitional period for mitigating the impact of the introduction of IFRS 9 on own funds, to provide clarity to institutions and users of information on the implementation of part of the disclosure requirements included in the CRR 'quick fix' and how institutions should disclose the information required.

In June 2020, EBA published new Implementing Technical Standards (ITS) on public disclosures by institutions and revised final draft ITS on supervisory reporting that implements changes introduced in the revised Capital Requirements Regulation (CRR2) and the Prudential Backstop Regulation. The two ITS aim to promote market discipline through enhanced and comparable public disclosures for stakeholders and to keep the reporting requirements in line with the evolving needs for Supervisory Authorities' risk assessments.

Consolidated Pillar 3 Report

Introduction - General Information

1.4.1 Location, timing and frequency of disclosures

Pillar 3 disclosures are provided on a quarterly basis in electronic format, after taking into consideration the relevant recommendation of EBA Guidelines 2016/11, which include the list of requirements to be considered for more frequent, than annual basis, disclosures.

Pillar 3 disclosures are provided with reference date (corresponding period) the close of the previous quarter and in conjunction with the date of publication of the financial statements. Equivalent disclosures made by the Group under accounting, listing or other requirements are deemed to constitute compliance with the requirements of the aforementioned Regulation (EU) No 575/2013 (Part Eight) taking into consideration any existing relevant implementing Regulations as well as the EBA guidelines.

Pillar 3 disclosures are a standalone document that provides a readily accessible source of prudential information for users and is available on a designated location on the Company's website (https://www.eurobankholdings.gr/en/investor-relations/financial-results) in chronological order and cover both quantitative and qualitative information.

Quantitative information, which is included in the Group's Consolidated Financial Statements, is also provided at the above location. In this way, the Company secures easy access of the market participants to continuous and complete information without cross-reference to other locations or media of communication.

Regarding the timing of disclosures, CRR clarifies that disclosures shall be published on the same date as the date on which the institution publishes its financial reports or as soon as possible thereafter. The Group's Pillar 3 disclosures will be published the latest either within one month from the publication of the financial statements or within the deadline of relevant Financial statements publication, as defined in Law 3556/2007.

The information contained in the Pillar 3 Disclosures has been verified by the Audit Committee and was approved by the Board of Directors on 26 May 2021.

Consolidated Pillar 3 Report

Introduction – General Information

1.5 Regulatory versus accounting consolidation

There is no difference between regulatory and accounting consolidation.

List of all Company's subsidiaries can be found in the Interim Consolidated Financial Statements note 17.

The table below shows the Group's regulatory and accounting Balance Sheet as at 31 March 2021 and 31 December 2020.

Table 1: Regulatory and accounting Balance Sheet

Balance sheet per published financial statements and per regulatory consolidation		31 March 2021	31 December 2020
	Ref.	€ million	<u>€ million</u>
Assets			
Cash and Balances with central banks		7,477	6,637
Due from credit institutions		2,633	3,336
Securities held for trading		118	87
Derivative financial instruments		2,221	2,552
Loans and advances to customers		37,546	37,424
Investment securities		9,214	8,365
Investments in associates and joint ventures		275	276
Property, plant and equipment		784	778
Investment property		1,450	1,459
Intangible assets	а	261	254
Deferred tax asset		4,507	4,526
of which deferred tax assets that rely on future profitability	b	1	2
of which deferred tax credit		3,658	3,690
of which deferred tax assets arising from temporary differences	С	848	834
Other assets		2,049	1,995
Assets of disposal group classified as held for sale		38	39
Total assets		68,573	67,728
Liabilities			
Due to central banks		8,790	7,999
Due to credit institutions		989	1,502
Derivative financial instruments		2,376	2,939
Due to customers		48,294	47,290
Debt securities in issue		1,530	1,556
Other liabilities		1,273	1,197
Total liabilities		63,252	62,483
Equity			
Ordinary share capital		816	815
Share premium		8,055	8,055
Reserves and retained earnings		(3,550)	(3,625)
of which cash flow hedge reserves	d	(30)	(49)
Total equity	f	5,321	5,245
Total equity and liabilities		68,573	67,728

Consolidated Pillar 3 Report

Capital Management

2. Capital Management

The amount and quality of the capital held by the Group is subject to certain rules and guidelines.

2.1 Transition rules

Regarding IFRS 9 adoption from 1.1.2018 and according to Regulation (EU) 2017/2395 of the European Parliament and the Council, a five year transition period is introduced, which allows banks to add back to their CET 1 capital 95% of IFRS 9 impact in 2018 and 85%, 70%, 50% and 25% in the subsequent four years.

According to the CRR 'quick fix' relief package, the IFRS 9 transitional arrangements have been extended by two years and a new calculation has been introduced where 100% relief is applied in 2020 and 2021 for increases in stage 1 and stage 2 provisions from 1 January 2020. Accordingly, the relief applied for 2022 is 75%, for 2023 50% and for 2024 25%.

The Group has elected to apply the phase in approach for mitigating the impact of IFRS 9 transition on the regulatory capital.

In addition, the CRR 'quick fix' with the Article 468 introduces a temporary treatment that allows institutions to remove from the calculation of their CET1 items unrealised gains and losses measured at fair value through other comprehensive income during the period from 1 January 2020 to 31 of December 2022.

The Group is not applying the temporary treatment specified in Article 468 therefore the own funds, capital and leverage ratios reflect the full impact of unrealised gains and losses measured at fair value through other comprehensive income.

Consolidated Pillar 3 Report

Capital Management

2.2 Key Metrics

The table below provides an overview of Group's prudential regulatory metrics as at 31March 2021.

Table2: Key Metrics

Available own funds (amounts)		31 March	31 March	31 December
Common Equity Tier 1 (CET1) capital		2021 (1)	2021	2020
Tier 1 capital	Available own funds (amounts)	<u>€ million</u>	€ million	<u>€ million</u>
Total capital Risk-weighted exposure amounts Risk-weighted exposure amount Risk-weight	Common Equity Tier 1 (CET1) capital	5,319	5,242	5,604
Risk-weighted exposure amount 40,800 40,782 40,237	Tier 1 capital	5,319	5,242	5,604
Total risk-weighted exposure amount 40,800 40,782 40,237	Total capital	6,314	6,237	6,554
Capital ratios (as a percentage of risk-weighted exposure amount) 13.0% 12.9% 13.9% 13.9% 17.1% 17.2% 13.9% 17.2% 13.9% 17.2% 13.9% 17.2% 13.9% 17.2% 13.9% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2% 17.2%	Risk-weighted exposure amounts

 $^{^{(1)}}$ Including interim profits (1/1/2020-31/3/2020) \in 70 million.

 $^{^{(2)}}$ Average figures based on previous 10 months' data points.

Consolidated Pillar 3 Report

Capital Management

2.3 Regulatory capital

The Group has sought to maintain an actively managed capital base to cover risks inherent in the business. The adequacy of the Group's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision and adopted by the European Union and the SSM in supervising the Bank.

The table below shows the composition of the Group's regulatory capital as at 31 March 2021 and 31 December 2020 which is calculated according to CRD IV.

Table 3: EU CC2 - Reconciliation of regulatory own funds to balance sheet in the audited financial statements

 $^{^{(1)}}$ Including interim profits (1/1/2021-31/3/2021) €70 million.

As depicted in table above, CET1 ratio has decreased during the 1st quarter 2021, mainly due the CRR transitional rules applied in the first quarter of each year (mainly IFRS 9 lower capital add back from 70% to 50%) and the increase of IRB shortfall from the implementation of new Definition of Default.

⁽²⁾ The Group's CET1 as at 31 March 2021, based on the full implementation of the Basel III rules in 2025 (fully loaded CET1), including interim profits would be 11.9% (31 December 2020: 12.0%).

Consolidated Pillar 3 Report

Capital Management

The CET1 ratio is defined as CET1 capital divided by RWAs, the Tier 1 ratio is defined as Tier 1 capital divided by RWAs and Total Capital Adequacy ratio is defined as Total Regulatory Capital divided by RWAs.

As at 31 March 2021, pursuant to the Law 4172/2013, as in force, the Bank's eligible DTAs/deferred tax credits (DTCs) against the Greek State amounted to € 3.658 million (2020 € 3.691 million). The DTCs will be converted into directly enforceable claims (tax credit) against the Greek State provided that the Bank's after tax accounting result for the year is a loss. In particular, DTCs are accounted for on: (a) the losses from the Private Sector Involvement (PSI) and the Greek State Debt Buyback Program and (b) on the sum of (i) the unamortized part of the crystallized loan losses from write-offs and disposals, (ii) the accounting debt write-offs and (iii) the remaining accumulated provisions and other losses in general due to credit risk recorded up to 30 June 2015. For further details please refer to Consolidated Financial Statements, Note 12.

According to Regulation (EU) No. 575/2013, article 39, deferred tax assets that can be replaced with a tax credit, shall not be deducted from CET1, but instead be risk weighted by 100%.

Consolidated Pillar 3 Report

Capital Management

2.4 IFRS 9 capital impact

Regarding IFRS 9 adoption from 1.1.2018 and according to Regulation (EU) 2017/2395 of the European Parliament and the Council, a five year transition period is introduced, which allows banks to add back to their CET 1 capital 95% of IFRS 9 impact in 2018 and 85%, 70%, 50% and 25% in the subsequent four years. The full impact is expected as of 1 January 2023.

According to the CRR 'quick fix' relief package, the IFRS 9 transitional arrangements have been extended by two years and a new calculation has been introduced where 100% relief is applied in 2020 and 2021 for increases in stage 1 and stage 2 provisions from 1 January 2020. Accordingly, the relief applied for 2022 is 75%, for 2023 50% and for 2024 25%.

The Group has elected to apply the phase in approach for mitigating the impact of IFRS 9 transition on the regulatory capital.

⁽²⁾ The increase of the RWAs compared to 31.12.2020 is due to (a) market risk and (b) investment securities purchases

Consolidated Pillar 3 Report

Capital Management

2.6 Supervisory Review and Evaluation Process (SREP) capital requirements

According to the decision of the 2020 Supervisory Review and Evaluation Process (SREP) performed by the ECB and the capital relief measures granted by the ECB in response to the Covid-19 outbreak starting from 18 March 2020, Eurobank Holdings is required to meet on a consolidated basis a Common Equity Tier 1 ratio of at least 9.25% and a Total Capital Adequacy Ratio of at least 14.06% (Overall Capital Requirements including the Capital Conservation Buffer of 2.5%, the Other Systemically Important Institution buffer of 0.5% and the applicable Countercyclical Capital Buffer of 0.06%% for the first quarter of 2021 stemming from the exposures in Bulgaria and Luxemburg).

The table below presents the capital requirements of the Bank for 31 March 2021.

	31 March 2021		
	CET1 Capital	Total Capital	
	Requirements	Requirements	
Minimum regulatory requirement	4.50%	8.00%	
Pillar 2 Requirement (P2R)	1.69%	3.00%	
Total SREP Capital Requirement (TSCR)	6.19%	11.00%	
Combined Buffer Requirement (CBR)			
Capital conservation buffer (CCoB)	2.50%	2.50%	
Countercyclical capital buffer (CCyB)	0.06%	0.06%	
Other systemic institutions buffer (O-SII)	0.50%	0.50%	
Overall Capital Requirement (OCR)	9.25%	14.06%	

In response to the Covid-19 outbreak, on 12 March 2020, the ECB announced a number of measures to ensure that its directly supervised banks can continue to fulfil their role in funding the real economy. Specifically, banks have been allowed, among others, to operate temporarily below the level of capital defined by the Pillar 2 Guidance and without prejudice to the restrictions set out in CRD IV, the Combined Buffer Requirement (i.e. Capital Conservation Buffer (CCB), Countercyclical Capital Buffer, Other Systemically Important Institutions Buffer) until at least the end of 2022, as per the latest ECB's communication issued on 28 July 2020. Banks are also allowed to partially use capital instruments that do not qualify as CET1 capital (i.e. AT1 or Tier 2 instruments), to meet the Pillar 2 Requirement (P2R).

At consolidated level, the Pillar 2 Requirement is set at 3% for 2020 and part of that (1.69%) must be held in the form of CET1 capital while the Group may use AT1 and Tier 2 capital, where available, for the remaining part. The amount of additional own funds required on a consolidated basis to be met with CET1 capital is € 690 million.

As at 31 March 2021 Eurobank's transitional CET1 ratio and Total Capital ratio were 13.0% and 15.5% respectively, which exceeded the 2021 transitional minimum requirements of 9.25%% and 14.06%.

Consolidated Pillar 3 Report

Credit Risk

3. Credit Risk

In June 2008, the Group received the approval of BoG to use the Internal Ratings Based (IRB) approach to calculate the capital requirement for credit risk. Therefore, with effect from 1 January 2008 the Group applies:

- The Foundation IRB approach to calculate risk weighted assets for the corporate loans' portfolio of Eurobank Ergasias S.A. in Greece;
- The Advanced IRB for the majority of the retail loans' portfolio of the Bank, i.e. mortgages, small business lending, credit cards and revolving credits in consumer lending;
- From September 2009 the Foundation IRB approach was applied for the corporate loans' portfolio of Eurobank Ergasias Leasing S.A. in Greece;
- From March 2010 the Advanced IRB approach was applied for the Bank's portfolio of personal and car loans.

The implementation of IRB covers 76% of the Group's lending portfolio excluding portfolio segments which are immaterial in terms of size and risk profile as well as, permanent exemptions. The Bank is in the process of reviewing the IRB roll out plan taking into account draft guidelines and its business plan. The updated roll out plan will be subject to ECB approval.

The following table presents the main changes in capital requirements of credit risk exposures under the IRB approach from 31 December 2020 to 31 March 2021:

Table 7: EU CR8 - RWA flow statements of credit risk exposures under the IRB approach

	31 March 2021			
	RWA	Capital		
	amounts	requirements		
	€ million	€ million		
RWAs as at 31 December 2020	15,325	1,227		
Asset size	179	14		
Asset quality	(251)	(20)		
Model updates	-	-		
Methodology and policy	30	2		
Acquisitions and disposals	-	-		
Foreign exchange movements	18	1		
Other	(8)	(1)		
RWAs as at 31 March 2021	15,293	1,223		

Asset size: Under this item the changes in RWAs due to the changes in EAD are reported. These changes can be due to new originations or repayments of the loans.

Asset quality: The changes to the RWAs due to the borrower risk (i.e. rating grade migration) are reported under this item.

Model updates: The changes to the RWAs due to updates in risk parameters following the annual validation process or regulatory reviews.

Methodology and policy: Under this item, the changes in RWAs due to regulatory framework changes are presented.

Foreign exchange movements: The changes to the RWAs due to the foreign currency translation movements are reported.

Other: Under this item the changes in RWAs due to other factors that are used in the calculation of RWAs are reported. These, for example, include changes in total sales of the corporate borrowers and maturity of exposures.

Consolidated Pillar 3 Report

Credit Risk

In the first quarter of 2021, RWAs show a net decrease of € 32 million due to the net effect of the improvement of retail portfolio asset quality which was counterbalanced by the increase of RWAs, primarily due to new loan disbursements and secondary due to application of the new default definition and foreign exchange movements.

Consolidated Pillar 3 Report

Market Risk

4. Market Risk

The Bank uses its own internal Value at Risk (VaR) model to calculate capital requirements for market risk in its trading book, for the Bank's activities in Greece. The Bank received the official validation of its model for market risk by the BoG in July 2005. The model is subject to periodic review by the regulator.

In 2011, the Bank updated its models and systems in order to fully comply with the BoG Governor's Act 2646/2011 for the trading book capital. The Bank calculates the capital for stressed VaR and IRC (incremental risk capital charge) since 31.12.2011.

For the measurement of market risk exposure and the calculation of capital requirements for the Bank's subsidiaries in Greece and in International operations, the Standardised approach is applied.

Furthermore, the Bank calculates and monitors the market risk of the banking book for its operations in Greece on a daily basis using the internal VaR model. For its operations abroad, Eurobank applies sensitivity analysis, whereas the VaR methodology is applied on a monthly basis.

The following table summarises the components of the capital requirement, under the IMA approach applied by the Bank as at 31 March 2021:

Table 8: EU MR2-B – RWA flow statements of market risk exposures under the IMA from 31 December 2020 to 31 March 2021.

	31 March 2021						
		Stressed		Comprehensive		Total	Total capital
	VaR	VaR	IRC	risk measure	Other		requirements

Consolidated Pillar 3 Report

Counterparty Risk

5. Counterparty risk

5.1 Definition

Counterparty risk is the risk that a counterparty in an off balance sheet transaction (i.e. derivative transaction) defaults prior to maturity and the Bank has a claim over the counterparty (the market value of the contract is positive for the Bank).

5.2 Mitigation of counterparty risk

To reduce the exposure towards single counterparties, risk mitigation techniques are used. The most common is the use of closeout netting agreements (usually based on standardised ISDA contracts), which allow the bank to net positive and negative replacement values in the event of default of the counterparty.

Furthermore, the Bank also applies margin agreements (CSAs) in case of counterparties. Thus, collateral is paid or received on a daily basis to cover current exposure. In case of repos and reverse repos the Bank applies netting and daily margining using standardised GMRA contracts.

5.3 RWA flow statements of CCR exposures under IMM

Table 9 EU CCR7 – RWA flow statements of CCR exposures under the IMM is not included as the Bank does not use an internal model for the calculation of the RWAs of CCR exposures.

Consolidated Pillar 3 Report

Leverage Ratio

6. Leverage Ratio

The new regulatory framework has introduced the leverage ratio as a non-risk based measure which is intended to restrict the build-up of excessive leverage from on and off balance sheet items in the banking sector.

The leverage ratio is defined as Tier 1 capital divided by the total exposure measure.

The bank submits to the regulatory authorities the leverage ratio on quarterly basis and monitors the level and the factors that affect the ratio.

The level of the leverage ratio with reference date 31 March 2021.on consolidated basis was at 8.27% (31 December 2020: 8.81%), according to the transitional definition of Tier 1 capital, significantly over the 3% minimum threshold applied by the competent authorities. The decrease of leverage ratio by 0.54% compared to 31 December 2020 is mainly due to the decrease of Tier 1 capital deriving from the CRR transitional rules applied in the first quarter of each year (mainly IFRS 9 lower capital add back from 70% to 50%).

In the table below, the detailed disclosures on the Group's leverage ratio are presented with reference date 31 March 2021 and 31 December 2020.

Table 10: EU LR1 - LRSum: Summary reconciliation of accounting assets and leverage ratio exposures

	31 March 2021 ⁽¹⁾	31 March 2021	31 December 2020
	<u>€ million</u>	<u>€ million</u>	<u>€ million</u>
Total assets as per published financial statements	68,548	68,548	67,728
Adjustment for entities which are consolidated for accountng puroses but are outside the scope of regulatory consolidation	-	-	-
Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting frameworkbut excluded from the leverage ratio exposure measure to article 429(11) of Regulation (EU)NO 575/2013	-	-	-
Adjustments for derivative financial instruments	(439)	(439)	(410)
Adjustments for securities financing transactions	1,025	1,025	1,195
Adjustment for off-balance sheet items (ie conversion to credit equivalent amounts of off-balance sheet exposures)	1,942	1,942	1,963
(Adjustment for intragroup exposures excluded from the leverage ratio exposure measure in accordance with Article 429 (7) of Regulation (EU) No 575/2013)	<u>-</u>	-	-
(Adjustment for exposures excluded from the leverage ratio exposure measure in accordance with Article 429 (14) of Regulation (EU) No 575/2013) (1)	(7,105)	(7,105)	(6,238)
Other adjustments	(564)	(571)	(604)
Total leverage ratio exposure	63,407	63,400	63,634

 $^{^{(1)}}$ Including interim profits (1/1/2021-31/3/2021) €70 million.

Consolidated Pillar 3 Report

Liquidity Risk

7. Liquidity Risk

The Group is exposed on a daily basis to events that affect the level of its available cash resources due to deposits withdrawals, maturity of medium or long term notes and maturity of secured or unsecured funding (interbank repos and money market takings), loan draw-downs and forfeiture of guarantees. Furthermore, margin calls on secured funding transactions (with ECB and the market) and on risk mitigation contracts (CSAs, GMRAs) result in liquidity exposure. The Group maintains cash resources to meet all of these needs. The Board Risk Committee (BRC) sets liquidity limits to ensure that sufficient funds are available to meet such contingencies.

Past experience shows that liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment. This is also the case with credit commitments where the outstanding contractual amount to extend credit does not necessarily represent future cash requirements, as many of these commitments will expire or terminate without being funded.

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks to be completely matched, as transacted business is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest bearing liabilities as they mature, are important factors in assessing the liquidity of the Group.

Liquidity Coverage Ratio (LCR) calculations

LCR as of 31 March 2021 is equal to 140.6%% (31 December 2020: 123.7%) on a group level.

The next table presents the key components of group's LCR, as per the respective guidelines on LCR disclosure (EBA/GL/2017/01). It should be noted that the data points used in the calculations below, refer to the period after the restoration of the LCR above the minimum regulatory threshold (100%).
